

SCHOOL INTERVIEW/DISCUSSION GUIDE

Name of school: SIKUDA SEED SECONDARY SCHOOL

1a	Does the Facility have a record of all assets provided under UgIFT. (Obtain a record and verify if it has the costs and numbers supplied)	YES.
1b	If Not ask how many were supplied and when.	It doesn't have the cost but numbers are supplied.
2	How does this facility Maintain (repair/service/replace) the assets provided under Ugift	Not applicable.

Currently the school assets that were delivered by Ugift are in good condition. However the school uses capitation grant to carry out maintenance for example the gas cylinder refilling which is planned to be done next term.

3	Does the facility take regular record about functionality/ or breakdown of the assets provided?	YES.
	Nonfunctional/ working, and reasons for non-functionality.	

YES, for example laboratory equipment are replaced when broken to support learners.

4	How has the UgIFT support helped in service delivery in the area, any issues, challenges and any recommendations for better program implementation.	
---	---	--

- Construction of SIKUDA seed school has supported learning in the community and the school enrolment has increased as compared when it was still under the community. With the increase in enrolment the school facilities are being inadequate. Number on government payroll are not enough as compared to increased number of student.

Currently the school is having 23 government payroll teachers. Some of the assets delivered are not used because of lack of training/knowledge on how to operate them. Fire extinguishers are still in box in the gate room.

SCHOOL VERIFICATION CHECKLIST

Recommendations:

- The school should be commissioned to allow full utilisation of the facility. Increase on the number of government teacher since the population of students has increased.
- Training of staffs on how to use the fire extinguishers.
 - Addition of more classes since the number of students has increased and it is expanded to continue increases.
