REAP	Resource Enhancement and Accountability Programme
SK&Co	Sejjaaka Kaawaase & Co Certified Public Accountants
UgIFT	Uganda Intergovernmental Fiscal Transfers

INCEPTION REPORT

1. Introduction and Background

1.1 Introduction

This inception report is a deliverable of the contract between Sejjaaka Kaawaase & Co Certified Public Accountants and The Resource Enhancement and Accountability Programme (REAP) to verify and record assets under the UgIFT programme. The inception report elaborates the consultant's approach to the assignment, the methodology and the workplan for execution of the contract.

1.2 Background

The Uganda Intergovernmental Fiscal Transfers (UgIFT) Program is a government programme implemented through a Program-for-Results (PforR) Launched and aligned with the broader IGFT Reform Programme (2015), UgIFT 1.0 began with US$200 million in FY2017/18, supporting Education and Health, and was later expanded through additional financing of US$300 million, including US$240 million in credit and US$60 million in grants, with US$50 million from the IDA Refugee Support Window, expanding beyond Education and Health to water and Environment and Agriculture (micro-scale irrigation) making the overall funding total of US$500 million.

The Intergovernmental Fiscal Transfer Reform Program (IGFT RP) was revised in 2020 to align with the Third National Development Plan (NDP III-2020/21 to 2024/25), and to directly contribute to Four (04) Programmes i.e. Human Capital Development, Public Sector Transformation, Natural Resources, Environment, Climate change, Land and Water Management, and Development Plan Implementation.

The Overall development objective of the UgIFT Program was to: "Improve the adequacy, equity, and effectiveness of financing and the oversight, management, and delivery of Local Government services in Education, Health, Water and Environment, and Agriculture (micro-scale irrigation), including refugees and their host communities".
Specifically, the Program sought to:

i. Increase the adequacy and predictability of fiscal transfers to Local Governments for service delivery;
ii. Improve the equity and transparency of allocation mechanisms through the introduction of formula-based transfers;
iii. Strengthen performance incentives and accountability systems for Local Governments; and
iv. Expand access to quality education and health infrastructure, particularly in underserved areas.

The UgIFT Program had four components aimed at strengthening the intergovernmental fiscal transfer system while supporting investments in service delivery infrastructure. These included;

Component	Description	Key Outputs	Expected Outcomes
Component 1: Reform of the Intergovernmental Fiscal Transfer System	Supported the design and implementation of a reformed fiscal transfer framework based on objective and transparent allocation criteria.	Introduction of formula-based grants - Revised allocation formulas reflecting population, infrastructure gaps, and service delivery needs	Improved equity in resource distribution across districts and municipalities - Increased predictability of local government funding
Component 2: Education Infrastructure Development	Financed the construction and upgrading of education facilities, particularly government secondary	Construction of new secondary schools - Classrooms, laboratories, administration blocks,	Increased access to lower secondary education - Reduced congestion in existing

Component	Description	Key Outputs	Expected Outcomes
	schools in underserved sub-counties	sanitation facilities, and teachers' houses	schools - Improved learning environments
Component 3: Health Infrastructure Development	Supported investments in health facilities to improve access to primary health care services at the local level	Construction and upgrading of health centers - Staff accommodation and sanitation facilities	Expanded access to health services - Improved service delivery capacity at local health facilities
Component 4: Local Government Performance and Institutional Strengthening	Strengthened local government capacity in planning, budgeting, procurement, and infrastructure management	Annual local government performance assessments - Capacity building and technical support - Strengthened monitoring and reporting systems	Improved efficiency and accountability in infrastructure implementation - Stronger local government institutional performance

The Programme was implemented through a clearly defined results framework that connected actions and incentives across three levels of government to strengthen service delivery outcomes. The program came to an end in December 2025 and accomplished the following outputs under the different components

a) **Budget Support**

- **Education**: 196 of 259 Seed Schools are complete of which 189 are operational
- **Health:** 354 of 373 health facility upgrades/new constructions (HC II to HC III) are complete
- **Water and Environment**: 758 - piped water systems, 5,398- point water sources, 7,082 water supply systems rehabilitated, 325 designs completed, and 256 sanitation facilities in
- **Agriculture** (Micro-scale Irrigation): Over 6,235 irrigation systems were installed (4,843 hectares under irrigation), 632 irrigation demonstration sites in 135 LGs set up,
- **Refugee intervention**: 51 primary schools and 35 health facilities in refugee hosting districts (RHD) were transitioned and integrated into the LG service
- **Blood banks:** Regional Blood Banks in Arua and Hoima were completed, commissioned while Soroti Regional Blood Bank was rehabilitated

b) Under grant management

Assets for institutional strengthening and retooling including ICT equipment and; vehicles. The Ministry of Finance planning and Economic development (MoFPED) through PFM Coordination Unit (RCU) manages the Government of Uganda counterpart funding of the programme to support the grant management component of the UgIFT programme. The grant management supports in financing of Central Government actions intended to achieve programme objectives and disbursement linked indicators (DLIs). To this end, MoFPED through RCU supported MDAs to acquire different assets meant to support programme implementation.

1.3 Justification of the verification

The UgIFT programme ended on 31st December 2025. As part of closure activities for the programme, MoFPED, through RCU, has planned to carry out an end-of-programme asset verification exercise to take stock of the assets procured under the programme, but also put in place plans to hand them over to the government for sustainability purposes. It's against this background that Sejjaaka Kaawaase & Co

Certified Public Accountants was contracted by RCU to undertake this exercise. This inception report therefore provides a roadmap that will be followed in undertaking the asset verification exercise.

1.4 Objectives of the Assignment

The consultant understands that the objective of the assignment is to undertake verification and recording of all assets acquired under the UgIFT Programme. Specifically, the assignment shall;

i. Identify and verify the existence of the assets
ii. Verify the assets condition and status: specifically, the condition on functionality, usage/performance and location among others
iii. Assess financial management aspects: residual value of the investments/hardware/tools for purposes of financial reporting for project closure
iv. List the assets that are obsolete, unserviceable and require disposal
v. Develop a computerised database of the investment/hardware/tools to facilitate the recording of new deployed assets/investments
vi. Undertake PFM Assessment on Asset Management practices (including sustainability, Operations and Maintenance) of the UgIFT implementing LGs

1.5 Scope of Work

The consultant understands that the assignment shall be conducted to cover all selected UgIFT beneficiary institutions distributed across the country and will involve the following tasks.

i. Verification of the Asset's Records
ii. Physical and Functional Verification
iii. Data Consolidation and Recommendations
iv. IFMIS Asset Register Update, Integration, and Migration
v. PFM Assessment of the UgIFT Asset Management Practices

1.6 Expected deliverables

Key expected outputs of the consultant include:

(i) Report with the list and current status of assets acquired under the programmes;
(ii) An automated up-to-date assets database of UgIFT Investments across MDA & LGs;
(iii) Report on the estimated value of assets under the programme as well as operations and maintenance arrangements;
(iv) IFMS-Ready Asset Register and Data Migration Report
(v) Report on functionality of assets relating to systems investments;
(vi) Report on Assessment of Asset Management Practices, Risks and Recommendations

INCEPTION REPORT

2. Approach and methodology

2.1. Understanding of the assignment

The verification exercise will deliver the following as understood by the consultant.

Table 1: Appreciation of deliverables

Deliverable	Appreciation	Approach
Verification of the Asset's Records	Cross-check document records with the source documents and conduct physical inspections of selected assets to confirm their existence, condition, and location **Source of Assets:** • Budget Support [Health and Education only] : *Water and Agriculture assets are outside the scope [Community Owned*) • Grant Management [*Per Asset Register*]	• Obtain records of all assets [Existing Asset Register etc] • Desk review of asset records including asset registers, procurement records, ownership certificates, and disposal reports • Matching verified physical assets with existing asset registers and procurement records. • Documenting all discrepancies: missing assets, unrecorded assets, misclassified assets • Allocation of Assets to be consistent with agreed Project Framework – *Flagging any discrepancies for follow-up*
	Output • Confirmation of the key particulars of the Asset (in the records and/or MUST be captured if missing) • Confirmation of **Existence** of the Asset • Confirmation of supporting evidence for **Ownership** • Identification of any gaps (records) in each asset	
Physical and Functional Verification	On-site physical inspections and verifications of assets for the selected UgIFT beneficiary institutions	Site visits and conduct engagements with site staff
	Output • Confirmation of the key particulars of the Asset (in the records and/or MUST be captured if missing) • Confirmation of Functionality of the Asset • Identification of any gaps (records) in each asset	

<table>
<tr><td rowspan="2">Data Consolidation and Recommendations</td><td>Appropriately consolidate data and provide any recommendations</td><td>Based on data obtained from the field and secondary sources, consolidate findings.</td></tr>
<tr><td colspan="2">Output
• Data Collection tools - based on the structure of the FARs capturing (Interalia)
  • Asset Barcodes / Tags Number
  • Asset Category /Class [Per GoU Chart of Accounts]
  • Asset Descriptions [Desk, chair, generator, etc]
  • Asset numbers – Existing numbers per tags [Note where numbers are missing]
  • Asset Location [Building, Office and Floors]
  • Asset Reporting Units [Department or Division]
  • Asset Serial numbers
  • Supplier
  • Other facts – Costs, Useful life, etc
  • Remarks – Condition, Impairment, Functionality
• Data Collection and Cleaning
• Data Triangulation and Gap Analysis
• Reports and Recommendations [Actionable Recommendations on: Asset Control Systems, Disposal of fully impaired assets, Asset allocation, monitoring and reporting, Maintenance practices</td></tr>
<tr><td rowspan="2">IFMIS Asset Register Update, Integration, and Migration</td><td>Consolidate all data into a single format and migrate all verified asset data into the official IFMS structure.</td><td>Data migration</td></tr>
<tr><td colspan="2">Output
• Clean data mapping against IFIMIS Register
• Authorisation for interface
• Migration
• Updated IFMIS Asset register
• Mapping of all verified asset attributes to the IFMS Asset Register Template fields and codes as per GoU Chart of Accounts and General Ledger.
• Verify barcode/QR/RFID numbers for each asset, ensuring end-to-end traceability
• Comprehensive Master Asset Register – ready for migration
• Data Migration: Develop and execute scripts for secure and accurate migration of the finalized asset data into IFMS.</td></tr>
</table>

	• **Testing & Validation:** Rigorous testing of the migrated data within IFMS to confirm accuracy, completeness, and proper functionality with existing IFMS modules.	
PFM Assessment of the UgIFT Asset Management Practices	Comparison of the established asset management practices against PFM asset management guidelines	Document review and interviews with the LGs
	Output • PFM Asset Management Guidelines • Current asset management practices as a baseline • Identification of Gaps between the two • Reconciliation	

Key Accounting Policy Issues affecting (FAR Values)

1. Obtain depreciation methods per category of assets and /or propose method in accordance with applicable accounting framework (IPSAS Accrual and/or IFRS) for GoU as elaborated in Annex 1 of the GOU Asset Accounting Policies and Guidelines.
2. Obtain and/or confirm useful lives (supporting evidence) of each category of assets – Annex 1 of GOU Asset Accounting Policies and Guidelines
3. Obtain historical cost per existing registered taking into account the dates of migration on to the IFMS register and/or the date the asset was first put into use
4. Determine book values (based on the above information and/or dates assets were put into use)
5. Update Register

INCEPTION REPORT

2.2. Technical scope of the exercise

The assignment will cover two level namely (i) National level MDAs and at Local governments where these assets are allocated. At the MDA level, the verification will focus on retooling assets including computers, Tablets, furniture and Motor vehicles while at the Local Governments the verification will concentrate on schools and health centres.

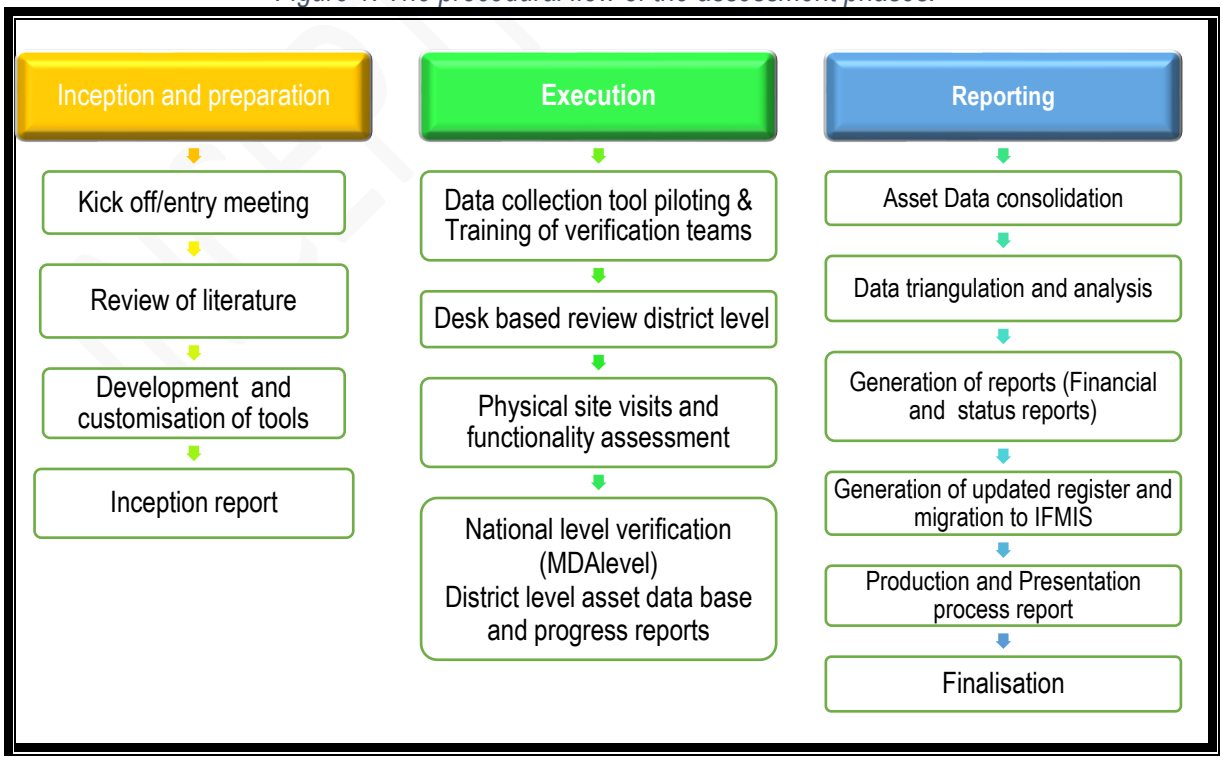

The MDAs to be visited include

- Ministry of Water and Environment
- The office of the Auditor General
- Ministry of Health
- Ministry of Local Government
- Public Procurement and Disposal of Public Assets Authority (PPDA
- Ministry of Gender, Labour and Social Development
- Ministry of Agriculture, Animal Industry and Fisheries
- Ministry of Education and Sports
- Office of the Prime Minister
- Ministry of Finance, Planning and Economic Development
- Ministry of Works and Transport
- Ministry of Lands Housing and Urban Development

2.3. Methodology

This verification exercise will follow highly participatory and consultative process and will be implemented in three interlinked phases: Preparatory and inception phase, Data collection phase and the report writing phase. The figure below elaborates the phases and the procedural flow of the activities in each phase.

Figure 1: The procedural flow of the assessment phases:

2.3.1. Inception and preparation phase

a) Kick Off /entry meeting

Upon completion of the contracting, the assignment commenced with an entry meeting on 29th May 2026 (See Appendix), where, the consultant 'Sejjaaka Kaawaase & Co Certified Public Accountants (SK&CO)' and the ministry team from Resource Enhancement and Accountability Programme (REAP) led by the Programme Administration Manager (PAM), head Human resource and administration held a debrief discussion regarding execution of the exercise. Key issues discussed during the initial meeting included the scope of the assignment, the approach and methodology, key deliverables and the timelines attached to the assignment.

The client also provided reference material to the consultant, including

- UgIFT Consolidated Fixed Assets Register FY 2024/25
- UgIFT Consolidated Fixed Assets Register FY 2023/24
- UgIFT Consolidated Fixed Assets Register FY 2022/23
- UgIFT Consolidated Fixed Assets Register FY 2021/22
- UgIFT Consolidated Fixed Assets Register FY 2020/21
- Uganda Intergovernmental Fiscal Transfers (UgIFT) Program for Results_P160250 Program Completion Report, APRIL 2026
- UgIFT End of Program Report (GoU ICR Report) 2026

During this meeting the client also identified the local government stakeholders to be engaged, including the accounting officers, district health and education officials, the district finance and administration offices, the seed school head teacher, and the health centre in-charge.

This meeting provided clear insight into the assignment requirements, which guided the next steps of the assignment.

b) Review of Relevant Documents

Based on the guidance, the consultant embarked on a review of the provided literature. This was intended to compile all secondary data facilitate the exercise. The consultant specifically compiled information on the geographical distribution of the assets to be verified as this supports the planning and deployment of verification teams for data collection.

A preliminary review of the documents provided the following asset distribution by subregion. The lists are included in annexes 2 and 3.

INCEPTION REPORT

Table 2: Number of Seed Schools , Health Centre upgrades by subregion and Blood Banks

Sub region	Number of Health Centre		Number of schools		Total
Central region	**Complete**	**Ongoing construction**	**Complete**	**Ongoing construction**	
Buganda	57	5	32	5	99
Eastern region					
Elgon	23	4	15	5	47
Bukedi	21	0	13	6	40
Busoga	26	0	20	3	49
Teso	19	0	14	0	33
Northern					
Acholi	10	0	8	6	24
West Nile	28	3	15	8	54
Lango	46	2	17	3	68
Karamoja	3	0	16	2	21
Western					
Ankole	49	0	16	7	72
Bunyoro	20	1	11	7	39
Tooro	37	4	10	10	61
Kigezi	15	0	9	1	25
Totals	**354**	19	**196**	**63**	**632**

Regional Blood Banks

Sub region	Regional Blood Bank	Characteristic	Total
Arua Blood Bank	1	Fully UgiFT	1
Hoima Blood Bank	1	Fully UgFT	1
Soroti Blood Bank	1	Upgraded by UgiFt	1
Totals	**3**		**3**

Source: Analysis of secondary data

c) Development and piloting of the Data Collection Tools

The review of documents also facilitated the development of the various data-collection instruments required to execute the exercise.

i. **Asset verification tool**: The literature review also provided insight into the government asset register template. This template has been used in developing the asset verification tool. The designed verification tool designed captures the following asset data details:

- Categorization of the Asset by Asset Class (Major); Asset Sub-Class (Minor 1); Asset Sub-sub- Class (Minor 2) in accordance with GOU Asset Accounting Policies and Guidelines.
- Asset barcode number
- Asset description e.g. office desk, office chair, generator etc.
- Asset number that corresponds to the existing numbers on the assets
- Asset locations indicating the main location building and floor
- Asset reporting units such as departments or divisions
- Asset serial numbers where applicable
- Supplier

After piloting and validation of this tool, it shall be rolled out and digitised on KoBoToolbox for tablets/smartphones. This will help generate a database linked to the IFMIS.

ii. **Key informant interview:** The consultant also developed a key informant interview guide on the asset management practices including operation and maintenance, asset functionality and value. These will be used to generate information relating to asset use and value during the exercise.

d) Preparation of Inception Report

This inception report has been prepared by the consultant and details the methodology for undertaking the assignment, the deployment plan, quality assurance measures, the work plan, and the team deployment plan with tasks to be performed.

2.3.2. Data collection Phase/ asset Verification process:

The data collection phase will require gathering information from the various local governments where the facilities and equipment are allocated. Hence, the verification exercise will cover all 176 local governments and the line MDAs at the national level.

The field data collection activity will be completed in 10 days with variation at regional levels based on the scope differences. This will be executed by a team of 84 people including, 6 National coordination team, 13 subregion supervisors and 65 enumerators. The detailed deployment plan for the verification exercise is showed in the table 3 below.

Table 3: Detailed deployment plan for the verification exercise.

Sub region	Total Physical assets	Enumerators	Supervisors	National team for MDA
Central region				6 members
Central 1 (south)	42	4	2	
Central 2 (North)	57	6		
Eastern region				
Bugisu	27	3	3	
Bukedi	36	4		
Busoga	49	5		
Teso	32	3		
Sebei	24	2		
Northern				
Acholi	36	4	4	
West Nile	45	5		
Lango	65	7		
Karamoja	21	2		
Western				
Ankole	72	7	4	
Bunyoro	39	4		
Rwenzori	24	2		
Tooro	37	4		
Kigezi	25	3		
Totals	**632**	**65**	**13**	**6**

i. Piloting the data collection tool and training of verification teams.

The tool will be piloted before full deployment and team training. The teams will then undergo a two-day centralised training to ensure a consistent understanding of the assignment and the tool before deployment to the field.

ii. Notification of Local Governments

Before actual visits to the LG, the coordination team, from RCU will send out notification to the Local Governments through formal introductory letters. This will be followed by the regional team leader to notify each of the LGs about the exact date of the verification exercise.

iii. Deployment of teams at local government level

This activity presents the actual verification exercise at the local government level and will involve the following activities.

a) Courtesy call to MDA/ Local Government leadership:

On entry into the MDA/ District/Municipality, the team will visit the office of the Accounting Officer, for an introduction and to present the verification work itinerary. The Accounting Officer will advise on the responsible officers to coordinate the exercise. This will also serve as the initial step for the exercise.

b) Desk review at MDA/ Local Government level:

The verification process in each MDA/ LG will follow a consultative approach. It will involve a review of program-related documents, including the UgFT asset delivery records, asset register, and joint monitoring reports. This will help identify information relating to the location, status, values, depreciation among other issues. It will also involve consultative discussions with the technical officers regarding the assets and the asset management practices. It will also enable verification of the asset records at the local government.

c) Visit the programme area sites

After the consultation and review of the reports with the MDA/LG officials, the team will carry out a physical verification of the assets. This will involve office assets of fixed nature provided to support the programs in MDA and LGs. In the Local governments that have the schools and health centres, the teams will verify the school assets. The team will take photographic evidence using GEO tags will clearly show status of the assets as supporting evidence during the field visits. This will describe the project, the location and time of the visit. This will enable Physical and Functional Verification.

Note that, the physical verification exercise will not include small office equipment like Stapling machines or punching machines and small school laboratory equipment that are disposable.

d) Functionality assessment

While at the MDA / LG/ facility, the team will engage the administrators/management of the facility to discuss functionality aspects relating to the objectives of establishing the facility, enlist any operational and maintenance challenges among others.

e) Exit debriefing

Upon completion of the verification exercise, the team will provide feedback to the responsible officer/ administration/ finance and conduct a final check of the recorded information. The debriefing meeting will also be used to seek further clarification on issues arising from the service level interviews.

Itinerary

The consultants observe that the verification is a formal assignment that will engage different stakeholders, a detailed schedule of events to be followed by the verification Teams has been drafted as below;

Table 4: Itinerary in the Local Government

Day	Activity
1	• Arrival and signing in the visitor's book by verification team at the Accounting officer's/CAO' Office
	• Entry meeting with finance and administration
	• Desk based review at of UgFT documents and asset register
2	• Physical verification of identified assets at Office level at MDA/LG offices and in the facilities (Health centres and school)
	• Service level interviews for functionality, maintenance and sustainability at MDA/LG/ facility level
	• Follow ups and filling available gaps and Debrief and Finalize verification

iv. Verification process report

After completion of the verification exercise for each local government, the field teams will provide a detailed process report identifying general issues, particularly in relation to (i) Asset Functionality Assessment, (ii) Maintenance and Operations Assessment, (iii) PFM Asset Management Assessment, and (iv) Capacity Assessment Tool, among others. These will inform the verification report, providing specific references to the issues.

2.3.3. Reporting phase

a) Data Consolidation, Analysis & Reconciliation

After the local government level data collection, the consultant will consolidate all collected data based on their categories. The objective for this task is to clean, validate and analyze all acquired data. This process will involve

- Data Cleaning & Validation based on outlier identification and correction
- Automated checks for data completeness and consistency.
- Matching verified physical assets with existing asset registers and procurement records.
- Documenting all discrepancies: missing assets, unrecorded assets, misclassified assets.

The cleaned data especially regarding asset register will be consolidated into a comprehensive data base as part of the deliverables for the assignment. This would later be migrated to update the IFMIS asset register.

b) Triangulation and analysis of data

The consultant will analyse the data to generate both statistical and financial reports.

- The statistical analysis will generate information regarding the status of the UgIFT assets including the status of management, operation and maintenance, completed and functionality among others. The report will contain statistic indicating extent and proportion by subregion for proper targeting
- Financial analysis will provide information regarding Financial Valuation. This will include indication of current value and remaining useful life for each asset., Assessing residual value based on the depreciation methods and market conditions. The financial report especially for assets under institutional strengthening and retooling component will provide recommendation in regard to disposal (obsolete, unserviceable)/ replacement and sustainability requirements.

c) Generation of an IFMIS Ready Asset Register and Data Migration

The objective of this task shall be to prepare and migrate all verified asset data into the official IFMIS structure, ensuring accuracy and full compliance. For the consolidated data base, the consultant shall undertake a template matching exercise and code the data base based on the IFMIS data mapping.
The following are some of the steps to be undertaken at this stage;

- Mapping of all verified asset attributes to the IFMS Asset Register Template fields and codes as per GoU Chart of Accounts and General Ledger.
- Verify barcode/QR/RFID numbers for each asset, ensuring end-to-end traceability
- **Data Migration**: Develop and execute scripts for secure and accurate migration of the finalized asset data into IFMS.
- **Testing & Validation:** Rigorous testing of the migrated data within IFMS to confirm accuracy, completeness, and proper functionality with existing IFMS modules.

After the testing of migrated data, the consultant will document the Migration Process, including challenges faced and resolutions.

d) Production and Presentation process report

The consultant will draft a detailed report of the verification exercise that will comprise of Asset Management Practices, Risks and recommendations regarding asset management, capacity building needs and sustainability measures.
This will be presented together with the different deliverables to the ministry team from Resource Enhancement and Accountability Programme (REAP) for feedback.

e) Finalisation of the assignment

Upon presentation and discussion of the draft report, the Consultant will review and address comments and suggestions from the meeting with ministry team from Resource Enhancement and Accountability Programme (REAP) for feedback to fine-tune the final report. A final report, together with the requite deliverables will be submitted to Resource Enhancement and Accountability Programme (REAP) This will make the end of the assignment.

2.4. Quality assurance

To ensure quality data is collected from the verification exercise, a three-layered quality assurance framework has been established as indicated below.

a) Supervision by the central Technical team
The Fieldwork Coordinator and the national verification team will conduct daily checks with each regional team leader to ascertain the day's fieldwork activities, challenges and constraints. Any issues arising will be addressed by the central technical team, led by the assignment team leader, and, where necessary, help will be sought from the REAP team.
b) Regional Team leader supervision
Each team will have a regional team leader who will ensure, the data collected is inline with the set protocol (register requirements). These will make daily checks to the teams under their jurisdiction ensuring that mistakes are corrected while the team is in the field. The regional team leader will ensure that each researcher submits daily log of activities in terms of LGs covered and the assets verified. All inappropriately completed or incomplete registers will be clarified, and the respective team member will be asked to follow up to complete them. The team leaders will keep a copy of each team member's register to validate all tools shared and flag any gaps or mismatches to the teams at source. The regional team leader shall consult with the team leader or the technical team for any clarifications that may be needed at any time during the field work.
c) Quality assurance during Data capture
The verification team will validate the asset registers at two levels. Before going to the respective entities, the team will be provided a copy of the entity register to make preliminary review of the records, identify any gaps and any mismatches. This will be valiated with the register at the entity during the entry and desk review to identify and bridge any gaps and discrepancies. The verification team member will also interact with the responsible entity officers while capturing the data. This will reduce chances for errors.
The data entry clerks shall manually check, and edit the returned filled questionnaires under the supervision of the data manager (statistician) and the team leader. This will ensure quality data is entered for the report. The data entry screens shall be periodically reviewed by randomly selecting entered questionnaires to verify the data.
Throughout the execution of this assignment, we shall use our Quality Control system with routine checks, to measure and control the quality of all deliverables.

2.5. Risk Mitigation Plan

The consultants risk mitigation plan outlines potential risks and strategies to mitigate the risks for the assignment.

Table 5: Risk mitigation plan

Risk Category	Specific Risk	Impact	Mitigation Strategy
Data Quality Risks			
Inaccurate/Incomplete Data Entry	Human error during field data collection, subjective assessment.	Compromised data integrity, unreliable reports, need for rework.	Real-time monitoring, daily synchronization, team lead review, immediate feedback loop to field teams, photo evidence for verification.
Errors in Client's Existing Registers	Initial data provided by client contains inaccuracies, duplicates.	Skewed comparison, reconciliation challenges.	Initial desk review to identify patterns of errors.
Operational & Logistical Risks			
Limited Site Access/Lack of Cooperation	Resistance from LGs/beneficiaries to grant access or provide information.	Delays in field verification, incomplete data, project timeline overrun.	Official letters of introduction from MoFPED / RCU. Clear communication strategy to LGs/beneficiaries on assignment purpose. Early engagement via client focal points.
Geographical Dispersion & Terrain	Assets spread across wide areas, some in remote/difficult terrain	Increased travel time, logistical challenges, team fatigue, delays.	Flexibility in daily schedules, rest days, real-time monitoring of team location/progress to re-route if necessary, mobile communication devices.
Security Concerns	Threats to field teams in certain regions.	Safety risks to personnel, cessation of activities.	Pre-travel security assessment. Coordination with local authorities/client security focal points.
Connectivity Issues (Field)	Inability to synchronize data from remote areas due to poor network.	Data backlog, delayed analysis, potential data loss.	Mobile app with robust offline capability
Health risk .	The Outbreak of Ebola in Eastern DRC	may affect proper movements especially along the Local governments near the boarder This may affect access and timely data collection	Timely escalation and strict adherence to the provided Ebola prevention SOPs. Teams in the region will be provided PPEs during the exercise
Project Management Risks			

Risk Category	Specific Risk	Impact	Mitigation Strategy
Timeline Overrun	Delays in any phase, unforeseen complexities	Failure to meet project deadline, financial penalties	Agile methodology with daily progress monitoring. Critical path analysis. Contingency buffer in project plan.
Targeted stakeholders are unavailable or unresponsive in providing the information and data required for the assignment.	The responsible officers at MDA/LG for asset registers are not available or are not willing to provide access to the team	Delays and failure to obtain required information leading to partially filled registers	The REAP team, as the primary contact persons for this assignment, makes prior arrangements and communications with the relevant MDAs/LGs.
Client Delays in Feedback/Approvals	Slow response from client on critical decisions, data review, or access.	Project delays, consultant idle time.	Clear communication plan with defined response times. Regular (e.g., weekly) progress meetings.
Scope Creep	Requests for additional tasks outside the ToR.	Dilution of focus, timeline overrun, budget overspending.	Strict adherence to the ToR and detailed Inception Report as baseline.

INCEPTION REPORT

3. TEAM COMPOSITION AND RESPONSIBILITY

The Consultant has deployed a team of 84 persons, including a team leader, five technical assistants, 13 subregion supervisors and 65 enumerators with the different roles as indicated in Table 6 below.

Table 6: Team composition and roles

Name	Position	Qualification	Roles
Overall coordination and national-level verification			
Prof Twaha Kigongo Kaawaase	Team Leader / Lead Auditor	• PhD (Auditing), University of Dar as Salaam • Master of Social Science in Accounting & Development Finance, University of Birmingham, UK • Postgraduate Diploma in Development Finance, University of Birmingham –UK • Bachelor of Commerce (Accounting) Upper Second Hons, Makerere University, Kampala • Registered Practicing Accountant with the Institute of Certified Public Accountants of Uganda (ICPAU); Practicing No. P0044 and certificate No. F106/25	• Lead Communications with the Client • Prepare Workplans • Responsible for overseeing the overall technical activities of the assignment • Lead Preparation of Project Deliverables/ Reports • Ensure Timely delivery of project deliverables
Prof. Samuel Sejjaaka	Co-team Leader	• Doctor of Philosophy in Accounting and Finance – Makerere University – 2005 • Master of Science in Finance (University of Strathclyde - 1989/90) • Postgraduate Diploma in Computer Science (Makerere University - 1987/88) • Bachelor of Commerce - Makerere University, Kampala - 1983/86 • Fellow of the Association of Chartered Certified Accountants (FCCA) of UK - 2004 • Certified Public Accountant of Uganda – 1999 • Member of the Association of Chartered Certified Accountants (ACCA) of UK - 1999	• Support the Team Leader in the preparation of Workplans • Support the Team Leader in overseeing the overall technical activities of the assignment. • Support in ensuring timely preparation of Project Deliverables/ Reports

Name	Position	Qualification	Roles
Alozius Gonza	Asset Verification Specialist	• MSc-IT (ongoing), ISBAT • Masters of Business Administration (MBA, Makerere University • Bsc. Land Economics (Hons – First Class), Makerere University • Diploma in Building and Civil Engineering • Registered Surveyor of Uganda (RSU) (Valuation Surveyor) with the Surveyors Registration Board with License No. 060/2025 • Former President, Institution of Surveyors of Uganda • Fellow of the Institution of Surveyors of Uganda (FISU).	• Undertake desktop reviews of all existing documentation • Prepare data collection tools • Undertake stakeholder engagements • Undertake physical and functional verification of assets • Prepare a master asset register summarizing all verified assets • Participate in preparation of project deliverables
Joel T Leku	Database/IT Systems Specialist	• Bachelors of Information Technology, Mbarara University of Science and Technology (MUST) • TOGAF® Enterprise Architecture Practitioner, The Open Group® Certification for People • TOGAF® Enterprise Architecture Foundation, The Open Group® Certification for People • Microsoft Certified: Data Analyst, online: Microsoft • Microsoft Certified: Azure Data Engineer Associate, online: Microsoft • MCP - Microsoft Technology Associate (MTA) - Certificate in networking, Microsoft • Certificate in computer Applications (CCA), Makerere University	• Undertake reviews of all existing documentation • Undertake digitization of verification tools/forms • Undertake IFMS Asset Register Update, Integration, and Migration • Participate in preparation of project deliverables
Eng. Dr. Julius Mulumba	Civil/Structural Engineer	• Doctor of Science (DSc.) in Structural Engineering, The Atlantic International University, Honolulu, USA	• Undertake desktop reviews of all existing documentation • Participate in preparation of data collection tools

Name	Position	Qualification	Roles
		• Master of Science in Civil Engineering, with Distinction, The University of Wales, Swansea, United Kingdom • Post Graduate Diploma in Hydraulic Engineering, The Hydraulics Research Institute, Delta Barrage Cairo, Egypt • Bachelor of Science in Civil Engineering (Hons), Makerere University Kampala, Uganda • Registered Civil Engineer with the Engineers Registration Board (ERB), License No. 412/2026	• Undertake stakeholder engagements • Undertake physical and functional verification of assets • Participate in preparation of a master asset register summarizing all verified assets • Participate in preparation of project deliverables
Teddy Mary Nagawa	National – Level Team and supervisor	• Bcom, Makerere University • ACCA; CPA	National-level verification Support the preparation of reports
Gilbert Ringtho	National Level Team and supervisor	• Bcom, Makerere University • ACCA; CPA	National-level verification Support the preparation of reports
Assuman Serubamba Mukasa	National Level Team and supervisor	CPA	National-level verification Support the preparation of reports
Kabuye Frank	National Level Team and supervisor	• Msc Accounting; Bcom, Makerere University • ACCA; CPA	National-level verification Support the preparation of reports
Zuraika Nakabuye	Data Verification Officer /Auditor and supervisor	• Msc Accounting; Bcom, Makerere University • ACCA; CPA	National-level verification Support the preparation of reports
Johnson Gumisiriza	Data Verification Officer and supervisor	• Master's Degree in Economic policy planning. • Graduate Certificate in Project Planning and Management • Bachelor of Science in Statistics and Economics	National level verification Support preparation of reports
Benson Bagorogoza	Data Verification Officer and supervisor National Team member	• Master of Arts Economic Policy Management (MA-EPM) • Bachelor of Science (Economics)	National level verification Support preparation of reports

Name	Position	Qualification	Roles
Local Government Verification team			
Eseza Kiconco Baribuganda	Data Verification Officer and supervisor	Bcom, ACCA, CPA	• Undertake Document Reviews • Support in development of verification tools • Undertake Document Reviews • Piloting of verification tools • Participate in the collection of data • Coordination with LGs during verification • Conduct spot checks and validation of data • Training of the regional data collection officers • Participate in the verification of assets
Doreen Musimenta	Data Verification Officer and supervisor	Msc Accounting; Bcom, CPA	
Najjembe Grace	Data Verification Officer and supervisor	Msc Accounting; Bcom, CPA	
Dennis Kamba	Data Verification Officer and supervisor	Bachelors of Science in Land Economics; Registered Surveyor of Uganda (RSU) ((Valuation Surveyor) with the Surveyors Registration Board	
Budali Denis	Data Verification Officer and supervisor	• Masters degree in Accounts	
Nandudu Sulaina	Data Verification Officer and supervisor	• Bachelors of Economics	
Nabirye Gloria	Data Verification Officer and supervisor	• Masters of Economic Policy Management	
Royal Katusime	Data Verification Officer and supervisor	• Bachelors of Statistics	
Mwesige Joseph	Data Verification Officer and supervisor	• Bachelors of Development Studies	
Ouma Godfrey	Supervisor Northern	• Masters of Science	
Adimo Racheal	Supervisor Northern	• Bachelors of Development Studies	
Sharypher Namuganga	Supervisor Central	• Bachelors of Development Studies	
Kiwalabye Mudasiru	Supervisor Central	• Masters of Economic Policy and Planning	
George Mugwanya	Supervisor Central	• Bachelors of Quantitative Economics	
Eastern Data Collection Officers	14 Data collection officers	• Bachelors degree	Verify assets and collect respective data per data collection tool.
Western Region Data Collection officers	14 Data collection officers	• Bachelors degree	Verify assets and collect respective data per data collection tool. Verify

Name	Position	Qualification	Roles
Northern Region Data Collection Officers	14 Data collection officers	• Bachelors degree	assets and collect respective data per data collection tool. Verify assets and collect respective data per data collection tool.
Central Region Data Collection Officer	16 Data collection officers	• Bachelors degree	

INCEPTION REPORT

4. DETAILED WORK PLAN

The assignment will be executed between June and end of July 2026 as per the schedule provided below.

.

Table 7: Work plan for the verification exercise

	Deliverables	June 2026				July 2026				Deliverables
A	**Planning and Inception phase**	**Wk1**	**Wk2**	**Wk3**	**Wk4**	**Wk1**	**Wk2**	**Wk3**	**Wk4**	
	• Inception meetings • Desk review of relevant documents • Developing of data collection tools • Preparation of Inception report • Submission of the inception report									**10 working Days** **Inception report (16th June)**
B	**Data collection phase/ Asset verification process**									
	• Mobilisation of teams, Tool Piloting and training materials • Training of verification teams • Notification to MDAs and LGs by REAP									**10 Days (18th-26th June)**
	• Team travels to the respective regions									**27th to 28th June**
	• Desk-based review at MDA/LG • Physical Site Visits and functionality assessment • District-level asset database and progress report.									**29th to 17th July**
C	**Reporting Phase**									
	• Asset data Consolidation and cleaning • Data Triangulation and analysis • Generation of reports (Financial and Status Reports)									**13th to 24th July**
	• Generation of updated register and • Production and presentation of process report and asset register • Uploading and migration to IFMIS • Finalisation									**27th-31st July**

5. ANNEX

Annex 1: Data collection instrument

DRAFT DATA COLLECTION TOOL FOR UNDERTAKING ASSET VERIFICATION FOR THE END OF THE UGANDA INTERGOVERNMENTAL FISCAL TRANSFERS PROGRAM (UgIFT)

1. GENERAL INFORMATION

Item	Details
Assignment Title	Asset Verification for the end of UgIFT Program in Uganda
Institution/Vote	
MDA / LG	
Department/Unit	
Physical Location	
Date of Assessment	
Assessment Team	
Respondent Name	
Position/Title	
Contact	

SECTION A: DESK REVIEW AND ASSET RECORDS VERIFICATION TOOL

A2. Asset Record Details

Field	Details
Asset ID/Code	
Asset Barcode Number	
Asset Description	
Asset Category/Class	
Serial/Model Number	
Supplier	
Purchase Date	
Invoice/LPO Number	
Acquisition Cost	
Funding Source	
Vote Code	
Department/Division	
Custodian/Responsible Officer	
Commissioning Date	
Useful Life	
Depreciation Method	
Salvage Value	
Current Book Value	

SECTION B: PHYSICAL ASSET VERIFICATION TOOL

B1. Physical Verification Checklist

No.	Verification Parameter	Yes	No	Remarks
1	Asset physically exists			
2	Asset location matches records			
3	Asset tag/barcode visible			
4	Serial number matches records			
5	Asset in operational condition			

6	Asset currently in use			
7	Asset accessible for inspection			
8	Asset properly maintained			
9	Asset secure from theft/damage			
10	Asset disposed appropriately (if applicable)			

B2. Infrastructure/Facility Verification (Schools and Health Facilities)

Parameter	Observation
Facility Name	
Facility Type	
GPS Coordinates	
Infrastructure Verified	
Completion Status (%)	
Operational Status	
Structural Condition	
Roofing Condition	
Flooring Condition	
Water Availability	
Electricity Availability	
Sanitation Status	
Accessibility Status	
Maintenance Status	
Safety Compliance	
Recommended Interventions	

SECTION C: FUNCTIONALITY AND OPERATIONS ASSESSMENT

C1. Asset Functionality Assessment

Parameter	Rating	Remarks
Functionality		
Utilization Level		
Adequacy for Intended Purpose		
Technical Performance		
Frequency of Use		
User Satisfaction		
Maintenance Adequacy		
Availability of Spare Parts		
Sustainability of Operations		

Note: Rating can be described as :1) Excellent- Fully functional with no defects; 2) Good – Minor wear and tear; 3) Fair – Requires moderate repairs; 4) Poor – Major defects affecting functionality; and 5) Non-functional – Not usable at all

C2. Maintenance and Operations Assessment

Question	Yes	No	Remarks
Preventive maintenance schedule exists			
Maintenance records maintained			
Budget for maintenance available			
Dedicated maintenance personnel available			
Asset insured where applicable			

Users trained on asset operation			
SOPs/manuals available			
Breakdown response mechanism exists			

SECTION E: FINANCIAL MANAGEMENT AND VALUATION TOOL

E1. Asset Valuation Assessment

Field	Details
Original Acquisition Cost	
Estimated Current Market Value	
Accumulated Depreciation	
Residual/Salvage Value	
Remaining Useful Life	
Depreciation Method Applied	
Valuation Basis Used	
Financial Records Reconciled	Yes/No
Supporting Documentation Available	Yes/No

E2. Financial Reconciliation Checklist

Item	Verified	Remarks
Asset appears in financial statements		
Cost charged to correct budget line		
Payment fully supported		
Asset register reconciles with expenditure records		
Asset acquisition approved		
IFMS entries consistent		
Variances identified		

SECTION F: DISCREPANCIES, RISKS AND DISPOSAL ASSESSMENT

F1. Discrepancy Identification

Type of Discrepancy	Description	Action Required
Missing asset		
Unrecorded asset		
Misclassified asset		
Duplicate asset		
Non-functional asset		
Obsolete asset		
Damaged asset		
Unauthorised transfer		

F2. Disposal Assessment

Asset	Disposal Recommended	Reason	Recommended Method
	In line with GOU Asset Management and Disposal policies		

Possible Disposal Methods: Write-off, Auction, Transfer, Recycling, Repair and redeploy, and Destruction

SECTION G: IFMS ASSET REGISTER UPDATE TOOL

Mandatory IFMS Field	Data Captured
Asset Physical Location	
Asset ID/ Asset Number	
Asset Category/Class	
Asset Model	
Description	
Serial/Item Number	
Supplier Details; Supplier Name, Supplier Number	
Invoice/LPO Number; PO Amount PO Number	
Commissioning Date	
Funding	
Purchase Details; Initial cost Tax Amount Amount Withheld Net amount paid Payment date Retention Amount	
Vote/Department/Entity	
Custodian Officer	
Manufacturer	
Condition Status	
Capacity	
Useful Life	
Warranty	
Depreciation Method	
Accumulated Depreciation	
Salvage Value	
Maintenance History	
Disposal Details	
Heritage	

H2. Capacity Assessment Tool

Area	Adequate	Inadequate	Remarks
Staff skills in asset management			
Knowledge of the IFMS asset module			
Availability of training			
Staffing levels			
Understanding of GoU asset policies			
Monitoring and supervision capacity			
Training Needs in Asset Management (Specify)			

INCEPTION REPORT

Annex 2: Training syllabus and program

1. Ethical conduct in research
2. Local government governance structures and reporting lines
3. The asset register and its components
4. Computer-Assisted Data Collection (Kobo Collect)
5. Verification reporting lines and expectations
6. Travel plans

Timetable for Training the Consultant Staff on the U-Gift Asset Verification Assignment

	Item	Time	Responsible Person
	Day 1 : 25th June 2026		
	Registration of Participants	8:30am – 9:00am	Dennis
	Participants self-Introductions	9:00am – 9:10am	All
	Introductory Remarks – Objectives of the training	9:10am – 9:15am	Team Leader SK & Co.
	Opening Remarks	9:15am – 9:30am	MoFPED
	UGift Programme Background, Objectives, Scope and Deliverables	9:30am – 9:45am	SK & Co.
	Local Government Governance and Reporting Structures	9:45am – 10:00am	SK & Co.
	Discussion	10:00am – 10:30am	SK & Co.
	Break	10:30am – 11:00am	Hotel
	Ethical Conduct in Research	11:00am – 11:15am	SK & Co.
	The Assets Register and its Components	11:15am – 12:15pm	SK & Co. & REAP Rep
	Discussion	12:15pm – 12:30pm	SK & Co.
	Lunch Break	12:30 – 2:00pm	Hotel
	The Assets Register and its Components	2:00pm – 3:00pm	SK & Co. & REAP Rep
	The verification Process I) Approach II) Content	3:00 pm – 4:00pm	SK & Co.

	Discussion	4:00pm – 5:00pm	SK & Co.
	Day 2 : 26th June 2026		
	Registration	8:30am – 9:00am	SK & Co.
	Recap	9:00am – 9:10am	SK & Co.
	Computer-assisted data collection tool	9:10am – 10:10am	SK & Co.
	Simulation	10:10am – 10:40am	SK & Co.
	Break	10:40am – 11:10am	Hotel
	Discussion	11:10am – 11:40am	SK & Co.
	Quality Assurance	11:40am – 11:55am	SK & Co.
	Verification Reporting lines and expectation	11:55am – 12:10pm	SK & Co.
	Administration, Travel plans, rooting and Teams	12:10pm – 2:00pm	SK & Co.
	Closing Remarks	2:00pm – 2:10pm	Team Leader
	Lunch and departure	2:10pm	All

INCEPTION REPORT

Annex 3: List of Seed Schools to be verified

Region1	Sub-region	DISTRICT	School / Sub County	Phase	Status

11.	Pamela Batenga	SDS/MoFPED
12.	Paul Kyazze	PMEO/MoFPED
13.	Ivan Kasozi	SE/MoFPED
14.	John Baptist Lusala	ES/MoFPED – Secretary

Min. 1: Opening Prayer and Introductions

1. The meeting commenced with an opening prayer led by one of the participants. Members thereafter introduced themselves according to the attendance list above.

Page 1 of 4

Min. 2: Communication from the Chairperson

2. The Chairperson welcomed members of the Contract Management Committee and the Consultant team to the meeting.
3. He emphasized that the assignment is critical in informing Government on the status and value of assets under the UGIFT Program. He further noted that although the assignment had experienced delays due to unavoidable circumstances, it remains important for strengthening asset management within Government.
4. The Chairperson highlighted that the assignment is intended to:
    a. Verify the existence and condition of assets;
    b. Assess how the assets are being utilized and maintained; and
    c. Generate recommendations to improve asset management frameworks within the RCU and Government institutions.
5. He also stressed the need for timely execution of the assignment and the importance of producing high-quality data and reports to inform decision-making and the next phase of the UGIFT Program.
6. Finally, the Chairperson assured the Consultant of the Contract Management Team's commitment to provide the necessary technical support, information, and documentation required for successful implementation of the assignment.

Min. 3: Communication from the Consultant

7. The Consultant team, led by Prof. Kawaase Twaha, expressed appreciation to MoFPED for awarding them the consultancy assignment.
8. The Consultant informed the meeting that:
    a. The contract commenced on 18th May 2026, although the actual start had been delayed;
    b. The Inception Report would be submitted by Tuesday, 2nd June 2026, after obtaining additional information required for clarification and gap filling;
    c. The Terms of Reference for the assignment were clear and the team was committed to addressing all the issues outlined therein;
    d. The consultancy assignment is time-bound and scheduled to run from May to June 2026.
9. The Consultant welcomed the support pledged by MoFPED/REAP and committed to ensuring the availability of the technical team throughout the execution period.
10. The Consultant further requested:
    a. Designated contact persons for coordination and deliverables;
    b. A schedule and contact list for Local Governments and MDAs; and
    c. Introduction letters to the respective stakeholders and respondents.
11. In addition, the Consultant highlighted the need for access to key reference documents, including:
    a. Fixed Asset Registers;
    b. Audit reports;

c. Program closure registers;
d. Local Government assessment reports; and
e. Any other relevant documentation.

12. The Consultant noted that while the Fixed Asset Register had been reviewed during bid preparation, it lacked asset cost information necessary for computation of residual asset values.
13. The Consultant also clarified that the assignment scope covers only the health and education sectors and excludes water and agriculture.

Min. 4: Discussions and Way Forward

14. During discussions, the meeting agreed on the following:

a. The Program Administration Officer/REAP (MW) would serve as the overall contact person for the assignment on behalf of MoFPED;
b. The FY2025/26 audit report was not yet available, and only the FY2024/25 audit report could currently be shared;
c. The UGIFT Secretariat would provide the Consultant with the required technical and coordination support;
d. PMEO, Mr. Paul Kyazze, would serve as an additional focal contact person and support the provision of any supplementary asset information before program closure;
e. Challenges relating to asset costing under the Grant Management arrangements in Local Governments would be handled by REAP;
f. The Inception Report would provide detailed methodologies and data collection tools to be used during the assignment;
g. REAP would formally write to MDAs, Local Governments, and service delivery points introducing the assignment and the Consultant team;
h. MDA representatives would be invited to participate in subsequent meetings related to the assignment;
i. Mr. Kassim Kawase would serve as the Consultant's official contact person;
j. Both hard and soft copies of the Inception Report would be submitted for timely review and comments;
k. PMEO would establish a WhatsApp coordination group for the consultancy assignment; and
l. The Consultant would provide progress briefs every two weeks using a reporting template to be shared.

Min 5 Closure

15. The Chairperson thanked members for participating in the meeting and reiterated the importance of producing quality reports that would inform Government decisions and the future direction of the country's development programs.

16. The meeting was adjourned accordingly.

ANNEX 1: ACTION PLAN FROM THE MEETING ON THE CONSULTANCY ASSIGNMENT FOR THE END OF UGANDA INTERGOVERNMENTAL FISCAL TRANSFERS (UGIFT) PROGRAM ASSET VERIFICATION

No.	Action	Responsible Person/Institution	Timeline
1.	Submit the Inception Report (hard and soft copies)	Consultant (SK&Co)	By 2nd June 2026
2.	Provide comments on the Inception Report	Contract Management Team/MoFPED	Immediately after submission
3.	Share key documents including audit reports, asset registers, and LG assessment reports	MoFPED/REAP/UGIFT Secretariat	Ongoing
4.	Provide contact lists and schedules for MDAs and Local Governments	REAP/MoFPED	Immediate
5.	Issue introduction letters to MDAs, LGs, and service delivery points	REAP/MoFPED	Immediate
6.	Establish a WhatsApp coordination group	$PMEO_1$ /MoFPED	Immediate
7.	Submit bi-weekly progress briefs using agreed templates	Consultant	Every two weeks
8.	Coordinate technical and operational support to the Consultant	UGIFT Secretariat/Contract Management Team	Throughout assignment
9.	Address challenges related to asset costing under LG Grant Management	REAP	Throughout assignment

15.	Rogers Mpagi	M&EO/MOES

Min.1: Opening Prayer

The opening prayer was led by Ms. Pamela Batenga and members introduced themselves as per the list of attendance

Min 2: Communication from the Chairperson

1. The Chairperson welcomed members and representatives from S&K Consultants and thanked them for attending the meeting.

2. He noted that some of the action points from the previous meeting had been addressed and informed members that the consultant had shared the draft Inception Report for review.
3. He appreciated members for their timely comments, which had already been shared with the consultant for consideration. He noted that the purpose of the meeting was to review the Inception Report, receive any additional comments, and finalize it in preparation for commencement of the assignment.
4. The Chairperson emphasized the importance of the consultancy in establishing a comprehensive asset register for investments implemented under the UgIFT Programme and stressed the need for timely implementation, adherence to the Terms of Reference, and close collaboration among all stakeholders.

Min 3: Presentation of the draft inception report

1. The Team Leader from S&K Consultants presented the Inception Report for the consultancy assignment to verify and record assets under the Uganda Intergovernmental Fiscal Transfers (UgIFT) Programme.
2. He explained that the objective of the assignment is to establish a comprehensive and accurate inventory of UgIFT-funded assets by verifying their existence, condition, functionality, ownership, utilization, and updating Government asset records, including integration into the IFMS Asset Register.
3. The consultant presented the proposed methodology, which includes desk reviews of relevant documentation, stakeholder consultations, development of data collection tools, physical verification of assets, functionality assessments, financial reconciliation, and validation of findings. The use of digital data collection tools was also proposed to enhance the accuracy and efficiency of the verification exercise.
4. The Team Leader further presented the composition of the consultancy team, comprising 84 personnel, including specialists in asset management, engineering, valuation, accounting, information technology, and data verification, supported by regional supervisors and data collection officers.
5. The consultant outlined the eight-week work plan covering the inception phase, training of verification teams, field data collection and asset verification, data analysis, consolidation of findings, preparation of a master asset register, updating the IFMS Asset Register, and submission of the final report.
6. In addition, draft data collection instruments were presented to assess asset ownership, physical existence, condition, functionality, maintenance arrangements, financial compliance, risks, and sustainability. The report

also included preliminary lists of UgIFT-funded education and health infrastructure assets to be covered during the verification exercise.

7. The consultant highlighted potential implementation risks, including delayed access to records, stakeholder availability, logistical challenges, and scope creep, and proposed mitigation measures to address them. He concluded by reaffirming the firm's commitment to delivering the assignment within the agreed timelines and in accordance with the Terms of Reference.

Min 4: Reactions to the presentation of the Inception Report

1. Members appreciated the quality of the Inception Report and noted that the proposed methodology adequately addressed the assignment objectives.
2. The Chairperson informed the meeting that the Ministry would share the relevant MDA and central asset registers with the consultant, while the ES team would provide updated information on completed projects.
3. Members also observed that the proposed two-week field verification period was ambitious and recommended a review of the timelines to make them more realistic.
4. Key technical comments on the report included the need to:
    a. Include clear KPIs and performance benchmarks for measuring progress and success.
    b. Provide a clear valuation framework and specify the depreciation methods to be applied.
    c. Align the asset disposal framework with Government and PPDA guidelines.
    d. Include supporting annexes such as training program, sample verification tools, and preparatory documentation.
    e. Strengthen quality assurance measures through supervisory reviews, verification checks, and discrepancy resolution procedures.
    f. Develop a structured stakeholder engagement and communication plan for Local Governments and other key stakeholders.
    g. Address ethical considerations, including confidentiality and data protection.
    h. Incorporate a capacity-building component for Local Government staff on asset management.
    i. Include completion rates and progress indicators for transparency.
    j. Clearly identify Local Government stakeholders to be engaged, particularly officers responsible for asset management.
    k. Ensure all categories of UgIFT-funded assets are covered and that physical verification captures location, photographs, and asset-

tagging information, while maintaining consistency with IFMS records.

Comments from the Accountant General's Office (AGO)

1. The AGO representative informed the meeting that the Fixed Asset Register Module was implemented in IFMS in July 2022 and that depreciation is calculated using the straight-line method. She noted that the Government has been migrating historical assets into IFMS over the past three years, with assets prefixed by "M" denoting historical assets.
2. AGO advised the consultant to obtain Local Government asset registers, with support from CAOs and CFOs, and confirmed that the central asset registers would be shared with the consultant.
3. REAP was requested to engage AGO on harmonizing the sharing arrangements, while PMOE was requested to share LGMSD reports.
4. Additional guidance included noting that depreciation rates vary by asset category, impairment remains under AGO's mandate, districts and municipalities maintain separate asset registers, MoLHUD should be included among the MDAs, and urgent communication should be sent to MDAs and Local Governments regarding the exercise.
5. AGO also supported the recommendation to review the proposed timelines for more realistic timeframes.

Approval of the Inception Report

Following the presentation and discussion of the Report, the draft inception report was approved with amendments/updates, allowing the consultant to proceed with fieldwork.

Min 5: Discussion and Way Forward

5. After discussion, the meeting agreed on the following actions:

No.	Action Point	Responsibility	Timeline
1	Incorporate comments and observations from the inception meeting into the final inception report.	S&K Consultants	Within 3 working days
2	Submit the revised inception report for approval.	S&K Consultants	Immediately after incorporating comments

3	Share central asset registers with the consultant	AGO /MoFPED/UgIFT Secretariat	Before the commencement of fieldwork
4	Share the final list of assets, sites, and contact persons with the consultant.	MoFPED/UgIFT Secretariat	Before the commencement of fieldwork
5	Issue introductory communication to Local Governments and beneficiary institutions.	MoFPED/UgIFT Secretariat	Before field deployment
6	Conduct training and orientation of verification teams.	S&K Consultants	Prior to fieldwork
7	Commence field verification and data collection activities in accordance with the approved work plan.	S&K Consultants	As scheduled
8	Provide weekly progress updates to the Ministry.	S&K Consultants	Throughout implementation
9	Hold periodic review meetings to address emerging issues.	MoFPED and S&K Consultants	Throughout implementation
10	Ensure verified asset data is reconciled and prepared for migration into the IFMS asset register.	S&K Consultants	During the reporting phase
11	Submit draft and final reports in accordance with the contract requirements.	S&K Consultants	As per the approved work plan

Min 6: Closure

There being no further business, the Chairperson thanked participants for their contributions and officially closed the meeting.
