

Budaka District - review of the record of assets held at the local government

1. What the district holds

The district parted with no record of assets. Everything on file about what Budaka was supplied was photographed at two of its facilities, and a facility's copy of a delivery note is not the district's register.

2. What it covers

Nothing at district level. Five facilities were gone round in a day and none of them can be checked against a holding kept at the district.

3. Completeness

Budaka handed over no books of its own.

4. What it can and cannot establish

A delivery note found at a facility is not the district's register. Supplied quantities for Budaka cannot be read from the local government.

5. Queries

- Obtain Budaka's own record of programme assets, or a written statement that the district holds none.
