

UgIFT asset verification: which facilities have sent data

Health centres and schools on the programme list, by team, supervisor and local government. Status of the files held in **raw-data-grouped** on 21 September 2026.

Status	Meaning
Received	The facility has its own folder of data (toolkit, report, photos or register) in raw-data-grouped.
Register only	No folder of its own, but its verification rows are in a consolidated register the team returned. The register is named against the facility.
Missing	Nothing on file for this facility. Where the same local government has a team folder the list does not name, the note says "possibly": the team may have visited it under another name.

632 facilities on the programme list: **450** received, **52** in a register only, **130** missing. Teams also sent data for **40** facilities the list does not name (shown in each team's full status table).

How this was worked out

- The facility list is **SCHOOLS BY DISTRICT AND HEALTH CENTRES.docx**: its schools table and its list of HC III upgrades and new constructions, plus the three regional blood banks named in the allocation. Each facility is given the team and local government from **team-distributions.docx**. Entries listed twice (Kapedo phases II and III, Kidubuli HC II, the two Nyamarunda rows) are counted once.
- Team members, supervisors and contacts are as written in team-distributions.docx. Kalangala has no team number there; it sits with Buvuma under "Islands", so it is shown with Team 31.
- A facility counts as **received** when a folder of its own in raw-data-grouped holds at least one file. The folder may be a full verification or a partial return; this report does not judge completeness.
- The list names many Phase II and III schools by sub-county, not by school. Those were linked to a team folder only where the team's own document for that school names the sub-county (for example Wol for Awor SSS in Agago, Gimara for Gopele SSS in Obongi, Kuluba for Nyakaliso SSS in Koboko). Spelling variants were linked by hand (Jagusi/Jaguzi, Kitwala/Kitwara, Kasasila/Kasasira and others).
- **Register only** rows come from the Team 7 schools sheet, Team 19's Mitooma and Sheema lists, the Busoga seed-school register and the DEPAUL consolidated register for Bunyoro, Tooro and Greater Mityana. The DEPAUL register labels some districts differently from the list (Kabahango under Kamwenge, Kabambiro under Bunyangabu, Buseregenyu under Mityana); the facility name was matched, and Kabingo was taken as the Kamwenge facility. It also carries rows for Muggi HC III labelled Kagadi; Muggi is a Mayuge facility with its own Team 16 folder, so those rows are not counted for Kagadi.
- Sheets that only reproduce the programme list or a district budget (Team 21 "TEAM 21 SSS (2).xlsx", Team 20 "TEAM 20 SSSs.xls" apart from St Anthony SSS) and district asset records such as the Busia LG forms were not taken as evidence that a facility sent data.
- "Possibly" notes point to a team folder in the same local government and of the same type that the list does not name. They are leads to confirm with the team, not matches.
