Workbook labels: REF denotes the reference valuation workbook, MF the ministry-format workbook and SK the field-record workbook. MODV is retained as a register vote code.

### 3 Executive summary

The Uganda Intergovernmental Fiscal Transfer (UgIFT) Programme verification brought together the assets held by national institutions and local governments for programme closure and continued service delivery. National verification began on 24 July 2026. Local government fieldwork ran from 24 August to 7 September 2026 across the Central, Eastern, Northern and Western regions.

The master-list account covers 629 distinct facility records, comprising 371 health centres and 258 schools. Verification materials or consolidated-register entries support 589 records, and reconciliation accounts for 40 further records. The asset register contains 225,133 asset rows, including 15,793 at national level.

The register classifies 211,613 rows, or 94.0%, as Functional and 13,520 as Faulty. Tags identify 50,211 engraved rows, or 22.3%: 21,023 carry UgIFT marking and 29,188 carry other marking. The total recorded value is UGX 986,778,303,394, with accumulated depreciation of UGX 177,319,698,579 and net book value of UGX 809,473,130,826 at the register cut-off of 30 September 2026.

The principal management priorities are durable identification, custody records, timely repairs and the installation of equipment held in store. Facility accounts from Nwoya and Nebbi show how power constraints limit the use of computers and medical equipment. Busia records equipment transfers between institutions, while examples from Kayunga and Kibaale identify furniture, building and utility repairs requiring attention.

Accounting Officers should link tags to the asset register and current custodian, approve and record transfers, and assign funded maintenance actions. Sector and local government teams should address power, installation and user training alongside equipment repairs. Future investment should include operating resources, technical support and the service spaces required to keep the assets in productive use.

Section 7 presents the findings and the corresponding tables. Appendices provide the count schedules, chart data, reconciliation outcomes and accompanying register details.

## **4 Introduction and background**

### **4.1 Introduction**

This report presents the end of programme verification and recording of assets acquired through the Uganda Intergovernmental Fiscal Transfer (UgIFT) Programme. The assignment established the existence, location, condition and use of programme assets and prepared the asset information for the Integrated Financial Management Information System (IFMIS). It covered investments held by national institutions and beneficiary local governments.

### **4.2 Background to the verification**

Programme implementation ended on 31 December 2025. The Ministry of Finance, Planning and Economic Development (MoFPED), through the coordination unit, commissioned the verification as part of programme closure and the planned handover of assets to government for continued service delivery. The Consultant reviewed asset records, inspected assets and assessed their functionality, then consolidated the results and recommendations.

At national level, the exercise covered equipment acquired for institutional strengthening, including computers, tablets, photocopiers, furniture, motorcycles and motor vehicles. At local government level, it covered government secondary schools in underserved subcounties and health facilities upgraded from Health Centre II to Health Centre III. The findings support decisions on custody, maintenance, use and financial reporting.

### **4.3 Justification**

Programme closure required a clear account of the assets available to sustain the services supported by UgIFT. Physical verification and review of the financial and operational records provided the basis for handover, asset registration and maintenance planning. Assessment of functionality and asset management practices also identified actions needed to protect the investments and support their continued use.

### **4.4 Objectives of the assignment**

The assignment aimed to verify and record the assets acquired under UgIFT. It identified the assets and their locations, assessed condition, functionality and use, and considered their financial value for programme closure reporting. It also identified obsolete and unserviceable assets requiring disposal, prepared an electronic asset database, and assessed public financial management practices relating to asset sustainability, operation and maintenance.

### **4.5 Scope of work**

The work covered the selected UgIFT beneficiary institutions across the country. It comprised review of asset records, physical and functional verification, data consolidation and recommendations, preparation of the IFMIS asset register, and assessment of asset management practices. Physical inspection excluded small office items such as staplers and punches and disposable school laboratory items.

Source: Client draft, paragraphs 10, 13, 35 to 49 and 161; accounting guidelines, section 3.3.3.

## 5 Approach and methodology

### 5.1 Inception and preparation

The exercise followed 3 phases: inception and preparation, data collection, and reporting. The entry meeting on 29 May 2026 agreed the scope, approach, deliverables and timetable. The Client provided consolidated fixed asset registers for financial years 2020/21 to 2024/25, which supported document review and the deployment plan.

The Consultant identified the Accounting Officers, district health and education officers, finance and administration offices, head teachers and health centre in-charges as the principal institutional contacts. A pilot at Buloba Health Centre III and Sumbwe Seed School in Wakiso District informed the verification tool and team deployment. The inception report set out the methodology, work plan, responsibilities and quality assurance measures.

### 5.2 Verification instruments

The asset verification tool captured the item, department, asset number, useful life in months, tag number, description, purchase date, date placed in service, recoverable cost, asset cost, accumulated depreciation, net book value, year to date depreciation, equipment status and remarks. A separate interview guide examined asset use, functionality, value, operation and maintenance. These instruments linked the physical inspection to the financial and service delivery assessments.

### 5.3 Data collection and field itinerary

National physical verification began on 24 July 2026. National data collection comprised 10 working days, including repeat visits. The institutions visited were the Ministry of Works and Transport (MoWT), Ministry of Education and Sports (MoES), Ministry of Agriculture, Animal Industry and Fisheries (MAAIF), Ministry of Health (MoH), Office of the Prime Minister (OPM), Ministry of Water and Environment (MoWE), Ministry of Gender, Labour and Social Development (MoGLSD), Local Government Finance Commission (LGFC), National Environment Management Authority (NEMA), Public Procurement and Disposal of Public Assets Authority (PPDA), Office of the Auditor General (OAG), Ministry of Public Service (MoPS), Ministry of Lands, Housing and Urban Development (MoLHUD), Ministry of Local Government (MoLG), and MoFPED.

The field team received training on 20 and 21 August 2026. Local government verification ran from 24 August to 7 September 2026 and comprised 10 working days of field data collection. The Consultant deployed 33 teams of 2 to 3 people, with 80 research assistants, 6 supervisors and a team leader, to cover 176 local governments.

The coordination unit issued formal introductory letters before the local government visits, followed by telephone notification from the Consultant. Teams entered through the Accounting Officer's office, reviewed programme delivery and asset records, and consulted the responsible technical officers. Facility visits combined physical and functional checks, photographs and interviews on operation, maintenance and sustainability.

**Table 1: Local government field itinerary**

| Day | Activity              | Work undertaken                                                                                                   |
|-----|-----------------------|-------------------------------------------------------------------------------------------------------------------|
| 1   | Arrival and entry     | Register the visit at the Accounting Officer's office and hold the entry meeting with finance and administration. |
| 1   | Document review       | Review UgIFT documents and the asset register.                                                                    |
| 2   | Physical verification | Inspect identified assets in offices, health centres and schools.                                                 |
| 2   | Service interviews    | Discuss functionality, maintenance and sustainability with institution and facility management.                   |
| 2   | Follow up and debrief | Complete follow up checks, debrief the responsible officers and finalise verification.                            |

Table 1 sets out the sequence followed within the local government visits.

## 5.4 Quality assurance

The Consultant applied 3 levels of quality assurance. The central technical team carried out field spot checks and addressed operational issues. Regional supervisors checked compliance with the verification protocol each day, reviewed activity logs and retained copies of the asset returns for validation.

The verification team reviewed the entity asset registers before visits and compared them with the records available during the entry meeting and desk review. Staff discussed the entries directly with responsible entity officers while capturing the data. Supervisors referred matters requiring clarification to the team leader and field coordinator while the teams remained at source.

## 5.5 Consolidation and reporting

The Consultant consolidated the verified asset data by category, matched physical assets to the institutional registers, and carried out statistical and financial analysis. The statistical analysis examined functionality, use, management and maintenance. Financial analysis addressed asset value and remaining useful life, and the verified data were arranged in the IFMIS structure.

The process report presented findings on asset management practices, challenges and recommendations to the ministry team under the Resource Enhancement and Accountability Programme (REAP). The Consultant incorporated the review comments in the final report and accompanying deliverables.

## 5.6 Classification and accounting basis

Recognition followed the control, service potential, past event and measurement criteria in section 3.2.1 of the Government of Uganda Asset Accounting Policies and Guidelines 2023. Small office equipment and loose tools followed section 3.3.3. Recorded value combines facility prices with programme unit-cost comparators selected by item, local government, period and asset class. The totals retain the register's unit-price comparison rules, including zero carrying amounts for unit costs below UGX 10,000.

The report uses the useful lives and commencement dates held in the register, with the asset classes and useful-life framework in Annex 1. Depreciation is straight line to 30 September 2026 with nil residual value, in accordance with sections 5.5 and 5.7; capital work in progress (CIP) is not depreciated. Net book value is cost less accumulated depreciation for each asset, with a minimum of zero.

Each row contributes one unit to the asset counts. Buildings use the buildings and structures class, transport uses the transport equipment class, and furniture uses the furniture and fittings class. At health centres, maternity warding takes precedence after buildings and transport; remaining beds, couches, trolleys, screens,

stands and lockers in the medical class join clinical furniture, and other medical items form clinical equipment. At schools, printers, photocopiers, cameras and projectors form support equipment; the computer category excludes network switches and support equipment. Other items retain a separate category so that the group totals reconcile.

Facility type identifies schools, health centres and national holdings. The local government book code links to the master-list and team-distribution geography, with cities and municipal councils assigned to the parent district and source-confirmed local corrections. Rwenzori and Tooro are presented together. The condition charts reproduce the Functional and Faulty classifications in the register; the use schedules distinguish damage wording from storage and commissioning wording in the field returns. Tags containing UGIFT or UGFT identify programme marking.

## **6 Project context**

### **6.1 Programme background and design**

UGIFT supported the reform of intergovernmental fiscal transfers and investment in local service delivery through a Programme for Results arrangement. The programme began in financial year 2017/18 with funding of USD 200 million for education and health. Additional financing of USD 300 million, comprising USD 240 million in credit and USD 60 million in grants, brought total funding to USD 500 million and extended the programme to water and environment and agricultural micro scale irrigation.

The financing included USD 50 million from the International Development Association (IDA) Refugee Support Window. The fiscal transfer reform was revised in 2020 to align with the Third National Development Plan for 2020/21 to 2024/25. It supported human capital development, public sector transformation, natural resources and environmental management, and development plan implementation.

### **6.2 Programme components**

Component 1 supported reform of the intergovernmental fiscal transfer system, including formula based grants that reflected population, infrastructure needs and service delivery requirements. Component 2 financed secondary education infrastructure in underserved subcounties, including classrooms, laboratories, administration blocks, sanitation and teachers' housing. Component 3 supported health centre construction and upgrading, staff accommodation and sanitation.

Component 4 strengthened local government planning, budgeting, procurement and infrastructure management. It supported annual performance assessments across 176 local governments, capacity development, technical support, monitoring and reporting. Government counterpart funding also supported grant management and retooling at national level through information and communications technology (ICT) equipment, motor vehicles and motorcycles.

### **6.3 Programme objectives**

The development objective was to improve the adequacy, equity and effectiveness of financing and the oversight, management and delivery of local government services in education, health, water and environment, and agricultural micro scale irrigation, including services for refugees and host communities. The programme sought more adequate and predictable fiscal transfers, transparent and equitable allocation formulas, stronger performance incentives and accountability, and wider access to education and health infrastructure in underserved areas.

## 6.4 Programme outputs

The programme outputs describe progress at closure. They provide the programme context for the asset verification results presented in section 7. The infrastructure outputs covered education, health, water and environment, irrigation, refugee host services and regional blood banks.

**Table 2: Programme outputs at closure**

| Sector                 | Outputs                                                                                                                                         |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| Education              | 196 of 259 seed schools complete; 189 operational.                                                                                              |
| Health                 | 354 of 373 health facility upgrades and new constructions complete.                                                                             |
| Water and environment  | 758 piped water systems; 5,398 point water sources; 7,082 water supply systems rehabilitated; 325 designs completed; 256 sanitation facilities. |
| Micro scale irrigation | More than 6,235 irrigation systems installed, covering 4,843 hectares; 632 demonstration sites in 135 local governments.                        |
| Refugee host services  | 51 primary schools and 35 health facilities transitioned into local government services.                                                        |
| Blood banks            | Arua and Hoima regional blood banks completed and commissioned; Soroti Regional Blood Bank rehabilitated.                                       |

Source: Client draft, paragraphs 69 to 75. These are programme outputs at closure.

Table 2 gives the programme context for the verification findings.

Source: Client draft, paragraphs 52 to 91.

## 7 Findings

### 7.1 Coverage and reconciliation of the master list

The master list contained 632 source rows representing 629 distinct facility records: 371 health centres and 258 schools. Verification materials or identifiable consolidated-register entries supported 589 records, and 40 records were accounted for through documented reconciliation. The coverage total is 629 master-list records.

The reconciliation confirmed replacements, operating names, programme eligibility and the location of transferred assets. The following outcomes retain the master-list identity and the corresponding reconciliation record. Reconciled names and receiving facilities are counted once within the master-list account.

**Table 3: Programme asset summary**

| Measure                                       | Register result |
|-----------------------------------------------|-----------------|
| Asset rows                                    | 225,133         |
| Functional classification                     | 211,613 (94.0%) |
| Faulty classification                         | 13,520          |
| Engraved assets                               | 50,211 (22.3%)  |
| Engraved with UgIFT marking                   | 21,023          |
| Engraved with other marking                   | 29,188          |
| Use flag YES                                  | 211,613         |
| Use flag NO with damage wording               | 2,569           |
| Not in use, stored and explicitly good or new | 483             |

| Measure                                        | Register result     |
|------------------------------------------------|---------------------|
| Facilities sharing or holding assets elsewhere | 42                  |
| Recorded value                                 | UGX 986,778,303,394 |
| Accumulated depreciation                       | UGX 177,319,698,579 |
| Net book value                                 | UGX 809,473,130,826 |

Source: facility-reconciliation.csv and supervisor-decisions.csv; selected final outcomes, one per master ID. Full identity and decision references are in Appendix 8.6.

Table 5 groups the documented outcomes. Operating-name and replacement entries can also have verification materials, so these counts are read as reconciliation outcomes. Appendix 8.6 gives each receiving facility or operating name and its supporting record.

The reconciliation also retains 24 ground-return identities outside the master-list names. These are listed by local government in Appendix 8.6, preserving the identity recorded in the return. They are treated as return identities for the reconciliation account.

Every master-list facility was accounted for through verification records or reconciliation.

## 7.2 National level

National holdings contain 15,793 asset rows with recorded value of UGX 49,280,832,686 and net book value of UGX 14,319,969,940. Ministries, departments and agencies (MDAs), hospitals and blood banks retain their own recorded vote and facility identities. The tables show the register's Functional and Faulty classifications in that order.

### 7.2.1 Ministry of Finance, Planning and Economic Development

**Table 6: MoFPED asset holdings and recorded value**

| Category                 | Qty | Recorded value UGX | Depreciation UGX | Net book value UGX | Functional / Faulty |
|--------------------------|-----|--------------------|------------------|--------------------|---------------------|
| ICT equipment            | 194 | 1,114,182,708      | 849,074,576      | 265,108,132        | 194 / 0             |
| Other assets             | 145 | 351,249,200        | 280,881,501      | 70,367,699         | 145 / 0             |
| Vehicles and motorcycles | 20  | 4,550,385,492      | 3,046,016,331    | 1,504,369,161      | 20 / 0              |
| Furniture and fittings   | 99  | 137,036,600        | 96,068,849       | 40,967,751         | 99 / 0              |
| Total                    | 458 | 6,152,854,000      | 4,272,041,257    | 1,880,812,743      | 458 / 0             |

Source: REF\_ALL\_UGIFT\_ASSET\_REGISTER\_MF\_TEMPLATE.xlsx, Asset Register, rows 2 to 225,134; BOOK\_TYPE\_CODE = MOFPED BK; all rows held on this national vote.

Table 6 records 458 assets. The tags identify 282 engraved assets, including 247 with UgIFT marking. The use flag is YES for 458 rows.

The acquisition records for desktop computers specify a 1 year warranty.

Source: REF register, Asset Register row 210447, Remarks; MOFPED BK.

### 7.2.2 Ministry of Works and Transport

**Table 7: MoWT asset holdings and recorded value**

| Category                 | Qty | Recorded value UGX | Depreciation UGX | Net book value UGX | Functional / Faulty |
|--------------------------|-----|--------------------|------------------|--------------------|---------------------|
| Vehicles and motorcycles | 1   | 248,520,051        | 240,236,049      | 8,284,002          | 1 / 0               |
| ICT equipment            | 60  | 141,622,956        | 78,639,704       | 62,983,252         | 44 / 16             |
| Other assets             | 27  | 58,496,000         | 33,328,532       | 25,167,468         | 27 / 0              |
| Total                    | 88  | 448,639,007        | 352,204,285      | 96,434,722         | 72 / 16             |

## 7.2.14 Other national holdings

**Table 19: Other national holdings by institution group**

| Institution group                 | Qty   | Recorded value UGX | Depreciation UGX | Net book value UGX | Functional / Faulty |
|-----------------------------------|-------|--------------------|------------------|--------------------|---------------------|
| Hospital holdings                 | 8,101 | 26,086,279,992     | 22,428,479,682   | 3,657,800,310      | 8,101 / 0           |
| Blood-bank holdings               | 158   | 56,989,669         | 39,276,491       | 17,713,178         | 158 / 0             |
| Kampala Capital City Authority    | 51    | 54,024,515         | 53,024,515       | 1,000,000          | 51 / 0              |
| MODV vote                         | 183   | 91,162,979         | 54,612,464       | 36,550,515         | 183 / 0             |
| Uganda Blood Transfusion Services | 115   | 52,998,180         | 36,830,704       | 16,167,476         | 115 / 0             |

Source: REF\_ALL\_UGIFT\_ASSET\_REGISTER\_MF\_TEMPLATE.xlsx, Asset Register, rows 2 to 225,134; Hospital, Blood bank, and MDA rows for KCCA BK, MODV BK and UBTS BK.

Table 19 retains the additional national votes and health institutions in the programme totals. Kampala Capital City Authority (KCCA) and Uganda Blood Transfusion Services (UBTS) are shown under their register identities. MODV is retained as the vote code used in the register.

Source: REF Asset Register, national ministry and agency book codes; all held facility types.

**Figure 2: MoFPED and MoES hold the largest ministry recorded values**

Source: REF Asset Register, national ministry and agency book codes; all held facility types.

Figure 2 compares recorded and net book values for ministry and agency votes, including their health and blood-bank holdings. Appendix 8.4 contains the amounts behind the chart and the national hospital holdings.

## 7.3 Local government level by region and sub-region

The regional findings use the facility types in the asset register. Master-list health-centre and school coverage is reported separately from asset-row totals. Reconciliation identities and outcomes remain together in section 7.1 and Appendix 8.6.

### 7.3.1 Central region

Central covers 62 health-centre and 37 school entries in the master-list account. The regional register contains 28,192 asset rows, with recorded value of UGX 163,598,168,583 and net book value of UGX 148,142,640,569. Its tags show 6,235 engraved assets, including 1,550 with UgIFT marking.

#### *Health centre assets*

**Table 20: Central health centre assets by report category**

| Category                    | Qty    | Functional | Faulty | Recorded value UGX |
|-----------------------------|--------|------------|--------|--------------------|
| Clinical equipment          | 3,820  | 3,477      | 343    | 3,841,175,878      |
| Clinical furniture          | 2,965  | 2,869      | 96     | 2,300,997,258      |
| Maternity ward equipment    | 1,369  | 1,289      | 80     | 1,089,294,692      |
| Health centre ICT equipment | 32     | 28         | 4      | 31,309,125         |
| Building blocks             | 392    | 376        | 16     | 33,813,320,507     |
| Vehicles and motorcycles    | 1      | 1          | 0      | 14,000,000         |
| Other assets                | 1,574  | 1,510      | 64     | 88,515,692         |
| Total                       | 10,153 | 9,550      | 603    | 41,178,613,152     |

Source: REF\_ALL\_UGIFT\_ASSET\_REGISTER\_MF\_TEMPLATE.xlsx, Asset Register, rows 2 to 225,134; region = Central; Facility type = Health centre; report category precedence in section 5.6.

Table 20 presents the recorded category, condition classification and value for these facilities.

#### *School assets*

**Table 21: Central school assets by report category**

| Category                               | Qty    | Functional | Faulty | Recorded value UGX |
|----------------------------------------|--------|------------|--------|--------------------|
| Building blocks                        | 855    | 829        | 26     | 114,779,193,132    |
| School furniture                       | 13,726 | 13,460     | 266    | 2,694,971,295      |
| School computers and related equipment | 1,365  | 1,115      | 250    | 3,380,475,151      |
| School support equipment               | 76     | 73         | 3      | 243,960,281        |
| Other ICT equipment                    | 80     | 80         | 0      | 133,750,000        |
| Other assets                           | 1,935  | 1,919      | 16     | 816,069,836        |
| Total                                  | 18,037 | 17,476     | 561    | 122,048,419,695    |

Source: REF\_ALL\_UGIFT\_ASSET\_REGISTER\_MF\_TEMPLATE.xlsx, Asset Register, rows 2 to 225,134; region = Central; Facility type = School; report category precedence in section 5.6.

Table 21 presents the recorded category, condition classification and value for these facilities.

Local government offices hold a further 2 transport assets with recorded value of UGX 371,135,738. These are included in the regional total and the sub-region schedule.

**Table 22: Central sub-region distribution**

| Sub-region | Asset rows | Functional | Faulty | Recorded value UGX |
|------------|------------|------------|--------|--------------------|
| Buganda    | 28,192     | 27,028     | 1,164  | 163,598,168,583    |

Source: REF\_ALL\_UGIFT\_ASSET\_REGISTER\_MF\_TEMPLATE.xlsx, Asset Register, rows 2 to 225,134; local government level, region = Central; geography crosswalk in sources.md.

Table 22 gives the sub-region distribution. Maintenance arrangements differ by institution. In Kayunga District, Busaale Health Centre III uses Primary Health Care funds and keeps a quarterly asset condition record. Musiitwa Seed Secondary School checks functionality each term and repairs furniture and fittings as resources permit; broken furniture stays out of use until repaired.

| Teso       | 20,665     | 19,649     | 1,016  | 73,007,967,745     |
| Sebei      | 4,182      | 4,009      | 173    | 16,460,976,360     |

Source: REF\_ALL\_UGIFT\_ASSET\_REGISTER\_MF\_TEMPLATE.xlsx, Asset Register, rows 2 to 225,134; local government level, region = Eastern; geography crosswalk in sources.md.

Table 25 gives the sub-region distribution. In Kamuli District, Kagumba Seed Secondary School reported that broken furniture had been repaired during the second term, while Kagumba Health Centre III kept an asset condition book. The Bubago health centre interview identified a need for user training and basic maintenance support for its oxygen concentrator. These examples link periodic condition checks and repairs to the staff skills required to keep equipment in use.

Source: O07; O28; O29; Appendix 8.8 gives the document and locator.

| Sub-region | Asset rows | Functional | Faulty | Recorded value UGX |
|------------|------------|------------|--------|--------------------|
| Acholi     | 9,141      | 8,448      | 693    | 38,493,172,843     |
| West Nile  | 17,639     | 16,924     | 715    | 42,592,742,135     |
| Lango      | 19,471     | 18,273     | 1,198  | 77,461,717,872     |
| Karamoja   | 6,052      | 5,407      | 645    | 19,953,656,899     |

Source: REF\_ALL\_UGIFT\_ASSET\_REGISTER\_MF\_TEMPLATE.xlsx, Asset Register, rows 2 to 225,134; local government level, region = Northern; geography crosswalk in sources.md.

Table 28 gives the sub-region distribution. At Todora Health Centre III in Nwoya District, the Gulu Regional Referral Hospital technical team handles major medical equipment maintenance, with breakdowns logged and referred through the District Health Officer. Lungulu Seed Secondary School funds minor repairs from school revenue and seeks district technical support. Its stored ICT equipment also shows why power connection and installation must accompany maintenance planning.

Figure 8 illustrates the corresponding assets documented during the fieldwork.

### 7.3.4 Western region

Western covers 124 health-centre and 71 school entries in the master-list account. The regional register contains 44,164 asset rows, with recorded value of UGX 266,480,769,152 and net book value of UGX 235,534,976,888. Its tags show 6,951 engraved asset, including 3,650 with UgIFT marking.

#### Health centre assets

**Table 29: Western health centre assets by report category**

| Category                    | Qty    | Functional | Faulty | Recorded value UGX |
|-----------------------------|--------|------------|--------|--------------------|
| Clinical equipment          | 6,207  | 5,206      | 1,001  | 7,855,051,324      |
| Clinical furniture          | 4,524  | 4,147      | 377    | 3,314,213,193      |
| Maternity ward equipment    | 2,088  | 1,975      | 113    | 2,061,342,456      |
| Health centre ICT equipment | 79     | 72         | 7      | 39,847,930         |
| Building blocks             | 521    | 498        | 23     | 55,417,096,693     |
| Other assets                | 2,146  | 1,844      | 302    | 362,399,665        |
| Total                       | 15,565 | 13,742     | 1,823  | 69,049,951,261     |

Source: REF\_ALL\_UGIFT\_ASSET\_REGISTER\_MF\_TEMPLATE.xlsx, Asset Register, rows 2 to 225,134; region = Western; Facility type = Health centre; report category precedence in section 5.6.

Table 29 presents the recorded category, condition classification and value for these facilities.

#### School assets

**Table 30: Western school assets by report category**

| Category                               | Qty    | Functional | Faulty | Recorded value UGX |
|----------------------------------------|--------|------------|--------|--------------------|
| Building blocks                        | 2,982  | 2,829      | 153    | 187,551,026,740    |
| School furniture                       | 18,481 | 17,570     | 911    | 3,795,991,248      |
| School computers and related equipment | 1,994  | 1,842      | 152    | 3,748,707,635      |
| School support equipment               | 216    | 205        | 11     | 540,667,126        |
| Other ICT equipment                    | 58     | 55         | 3      | 87,102,923         |
| Vehicles and motorcycles               | 1      | 1          | 0      | 196,018,110        |
| Other assets                           | 4,867  | 4,577      | 290    | 1,511,304,109      |
| Total                                  | 28,599 | 27,079     | 1,520  | 197,430,817,891    |

Source: REF\_ALL\_UGIFT\_ASSET\_REGISTER\_MF\_TEMPLATE.xlsx, Asset Register, rows 2 to 225,134; region = Western; Facility type = School; report category precedence in section 5.6.

Table 30 presents the recorded category, condition classification and value for these facilities.

**Table 31: Western sub-region distribution**

| Sub-region         | Asset rows | Functional | Faulty | Recorded value UGX |
|--------------------|------------|------------|--------|--------------------|
| Ankole             | 13,891     | 12,993     | 898    | 95,721,072,014     |
| Bunyoro            | 12,048     | 11,729     | 319    | 57,305,075,383     |
| Rwenzori and Tooro | 9,778      | 7,846      | 1,932  | 46,836,589,669     |
| Kigezi             | 8,447      | 8,253      | 194    | 66,618,032,086     |

Source: REF\_ALL\_UGIFT\_ASSET\_REGISTER\_MF\_TEMPLATE.xlsx, Asset Register, rows 2 to 225,134; local government level, region = Western; geography crosswalk in sources.md.

Table 31 gives the sub-region distribution. In Buliisa District, Avogera Health Centre III undertakes some repairs locally and receives support from Hoima Regional Referral Hospital. Ngwedo Seed Secondary School engages a caretaker monthly for repairs and uses the Directorate of Industrial Training for furniture repairs. In Kyenjojo District, Kyankaramata Health Centre III uses Primary Health Care funds for minor repairs, while the interview identifies the cost of major work as a constraint.

Source: O22; O23; O25; Appendix 8.8 gives the document and locator.

Figure 10 illustrates the corresponding assets documented during the fieldwork.

## 7.4 Functionality of assets

The register classifies 211,613 asset rows as Functional and 13,520 as Faulty. The Functional share of register rows is 94.0%. Figures 11 and 12 show the classifications by report category and sub-region; Appendix 8.3 provides the underlying counts.

The REF register classifies each entry as Functional or Faulty. Functional includes working, available, verified and new items together with the register's default classification; Faulty includes defective items and items recorded as stored or otherwise out of use. The percentages in section 7.4 describe these register classifications. The separate use analysis retains the stated reasons for damage and storage.

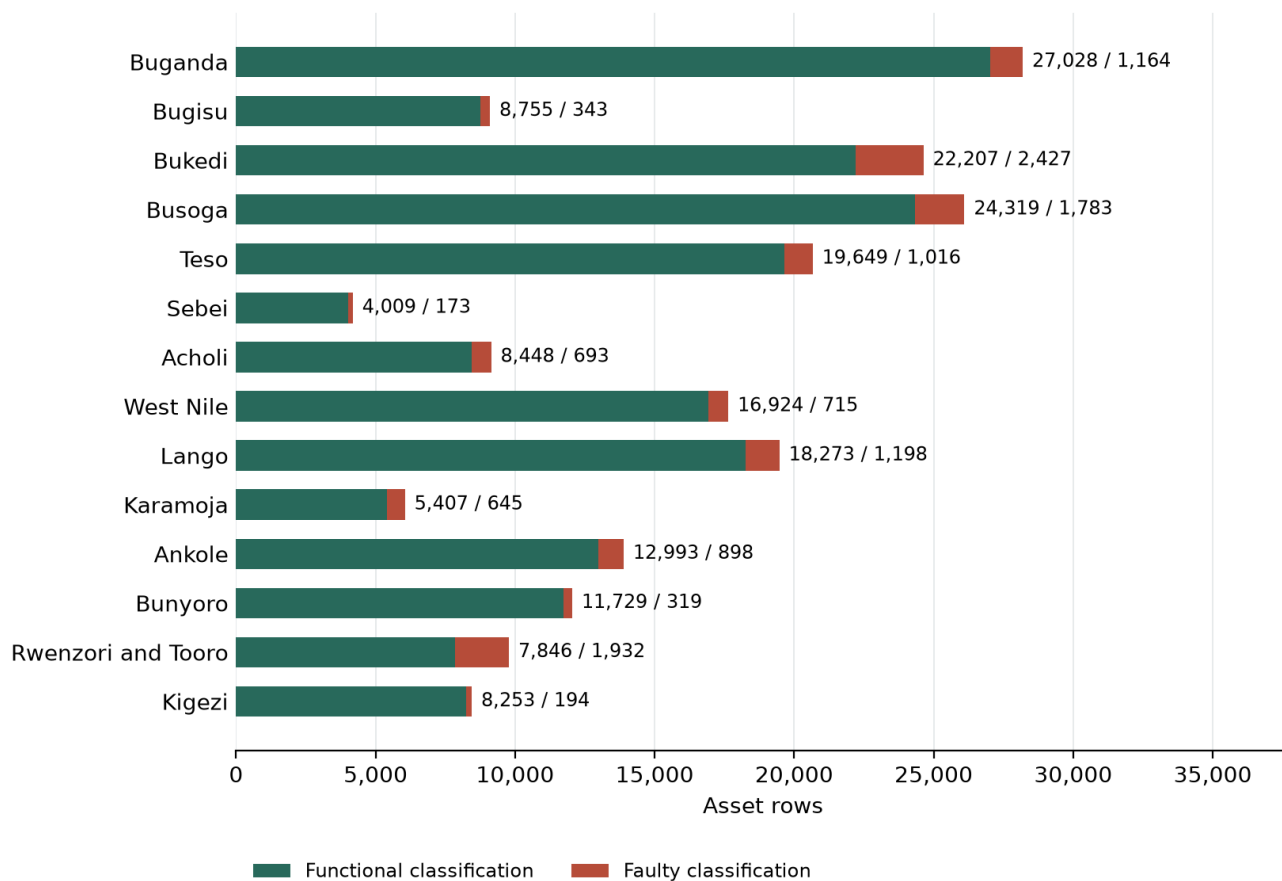

Source: REF Asset Register, all rows; report category and ATTRIBUTE14 condition.

**Figure 11: School furniture forms the largest asset category**

Source: REF Asset Register, all rows; report category and ATTRIBUTE14 condition.

## The Functional classification predominates across sub-regions

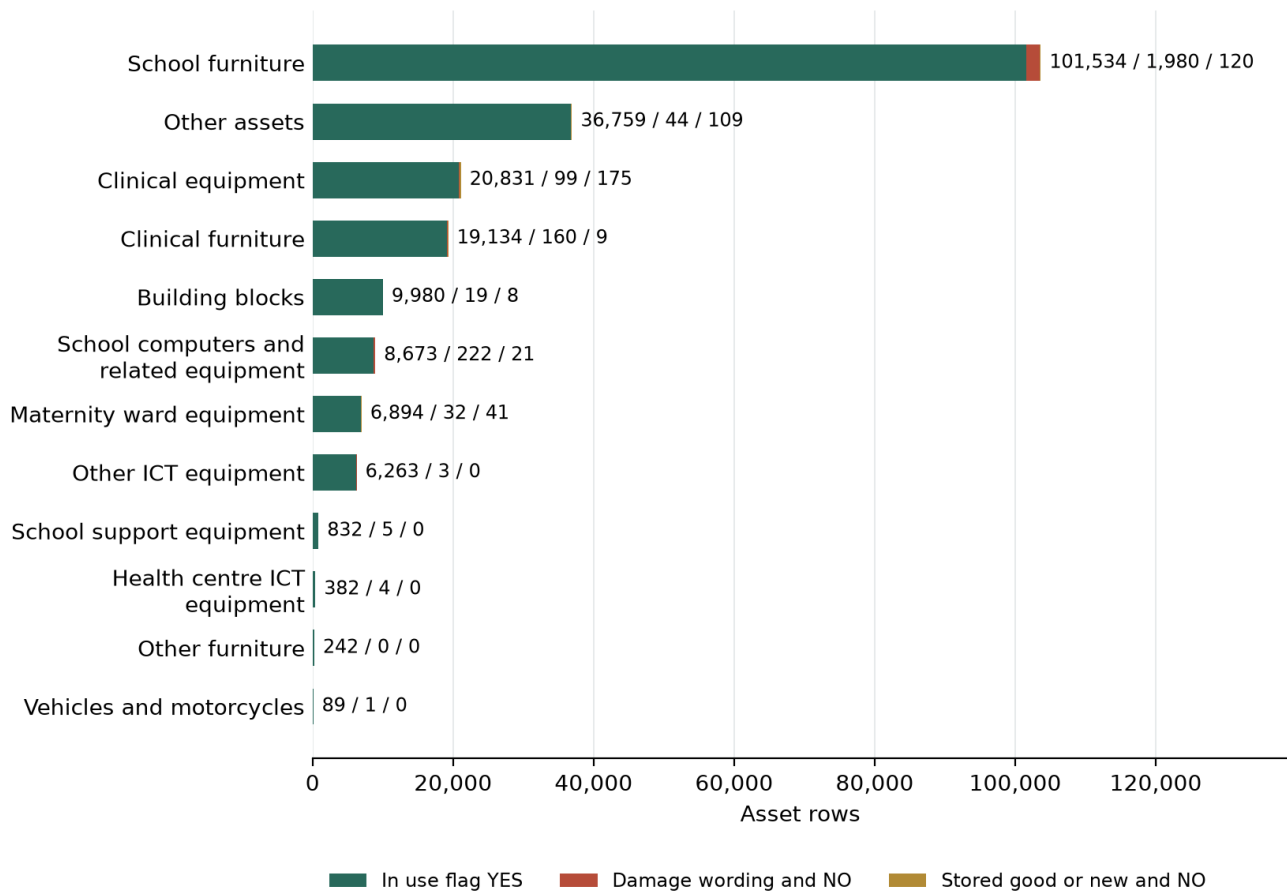

Source: REF Asset Register, local government rows; sub-region mapping and ATTRIBUTE14.

**Figure 12: The Functional classification predominates across sub-regions**

Source: REF Asset Register, local government rows; sub-region mapping and ATTRIBUTE14.

The use schedule examines a different management question: whether a row carries the use flag YES or carries the flag NO with damage or storage wording. It directs attention to repair, installation and commissioning actions in the facility accounts. These wording groups are retained separately from the register condition classifications.

### Recorded use is concentrated in school furniture

Source: REF Asset Register, IN\_USE\_FLAG; SK condition and remarks for non-use reasons.

**Figure 13: Recorded use is concentrated in school furniture**

Source: REF Asset Register, IN\_USE\_FLAG; SK condition and remarks for non-use reasons.

Figure 13 presents the use schedule by category. The full values are in Appendix 8.5.

## 7.5 Asset management practices and risks

### 7.5.1 Storage and utilisation

Storage does not always indicate that an asset is damaged. In Nwoya District, Lungulu Seed Secondary School held computers and related equipment while awaiting a suitable power connection. In Moroto District, the report described neonatal equipment in its original carton and treatment trolleys still wrapped at Kalemungole Health Centre III. These cases call for an installation and use plan linked to the service requirements of each facility.

Changes in custody and use also require active management. The Busia report records transfers from Bumunji, Buwembe and Majanji health centres to Masafu Hospital. In Nwoya District, equipment intended for Todora was directed to Paraa during construction, with the district report recommending formal transfer and updated asset ledgers. At Rupa Seed School in Moroto, the library and ICT block were being used as dormitories, affecting the availability of the rooms for their intended purpose.

Source: O10; O13; O15; O18; O19; Appendix 8.8 gives the document and locator.

**Figure 14: Boxed computers and related equipment in a seed school store, Nwoya District (Acholi)**

Source: Field photographic record P07; Nwoya District; photograph locators in Appendix 8.8 and sources.md.

Figure 14 shows the boxed equipment documented in the Nwoya field report.

### 7.5.2 Records and maintenance arrangements

Facilities used several practical approaches to condition monitoring. Busaale Health Centre III in Kayunga kept a physical inventory file and quarterly records, while Musiitwa Seed Secondary School checked functionality each term. Kagumba Health Centre III in Kamuli maintained an asset condition book. These practices provide a basis for linking a fault, its repair and the return of an asset to use.

Technical maintenance was organised through both facility and external support. Todora Health Centre III in Nwoya referred major equipment repairs to the Gulu Regional Referral Hospital team, while Avogera Health Centre III in Buliisa used Hoima Regional Referral Hospital for many repairs. Ngwedo Seed Secondary School in Buliisa engaged a caretaker monthly and received furniture repair support from the Directorate of Industrial Training. These arrangements should be linked to institution work plans and repair priorities.

Funding and access to technical skills affected the pace of repairs. Musiitwa Seed Secondary School kept damaged furniture out of use until funding allowed repairs. Kyankaramata Health Centre III in Kyenjojo used Primary Health Care funds for minor repairs but identified the cost of major repairs as a constraint. Avogera

Health Centre III described difficulty finding technicians familiar with some equipment and the need for staff orientation.

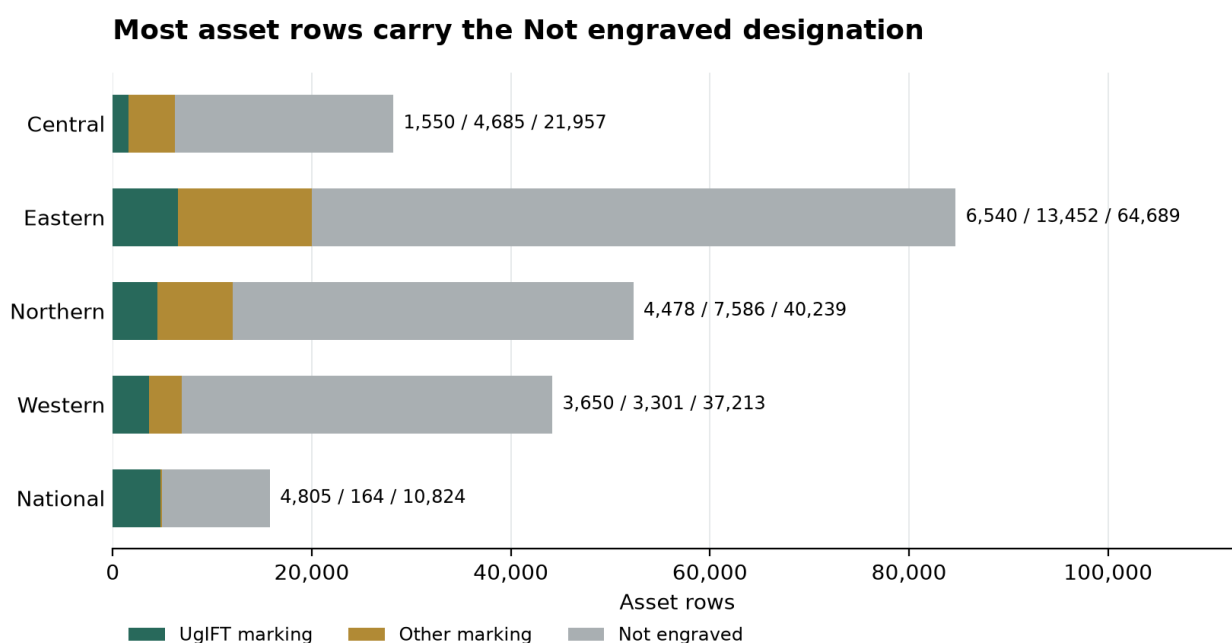

Source: O01; O02; O04; O07; O14; O22; O23; O25; Appendix 8.8 gives the document and locator.

### 7.5.3 Risks and challenges

Power supply, building condition and storage capacity directly affect the useful service obtained from equipment. Pamaka Health Centre III in Nebbi reported that power and solar constraints prevented use of oxygen equipment, while Busaale Health Centre III in Kayunga identified a leaking maternity roof, damaged door hinges and batteries requiring replacement. Nyamarunda Health Centre III in Kibaale reported electrical installation, drainage, water security and storage concerns. Repairs should therefore consider the room and utility services alongside the individual item.

The main asset management risks illustrated by these cases are prolonged storage, delayed repairs, changes of custody without timely ledger updates and equipment operating in unsuitable conditions. Durable identification needs to remain linked to the asset's recorded location and custodian throughout its life. An asset that has been moved, repaired or repurposed requires an authorised decision and a corresponding update in the institutional records.

Source: O03; O10; O13; O15; O16; O21; Appendix 8.8 gives the document and locator.

Source: REF Asset Register, TAG\_NUMBER; case-insensitive UGIFT or UGFT matching.

**Figure 15: Most asset rows carry the Not engraved designation**

Source: REF Asset Register, TAG\_NUMBER; case-insensitive UGIFT or UGFT matching.

Figure 15 shows the identification position by region and at national level. The count schedule is in Appendix 8.5.

### 7.5.4 Recommendations

Accounting Officers should complete durable asset identification and link each tag to the institution register, location and custodian. Transfers between facilities should identify the releasing and receiving institutions, the authorised purpose and the new custody arrangement. Facility and district records should be updated when an asset is received, moved, repaired or disposed of.

Institutions should prepare funded preventive maintenance and repair plans that distinguish routine work from specialist repairs. Health facilities should agree referral arrangements with their district and regional technical teams, maintain a fault log and record repair completion. Schools should include furniture, buildings and ICT servicing in their annual budgets and condition reviews.

Future investment plans should confirm power, water, storage, room suitability and staff capability before equipment is commissioned. Procurement and handover should include user orientation, appropriate technical support and follow up checks after installation. Facility managers should participate in the assessment of needs so that equipment quantities and specifications match the services and space available.

Source: O01; O04; O10; O12; O13; O14; O20; O21; O22; O23; O25; Appendix 8.8 gives the document and locator.

Source: Field photographic record P10; Tororo District; photograph locators in Appendix 8.8 and sources.md.

Figure 16 provides an example of programme marking recorded on school furniture.

## 7.6 UgIFT support to service delivery

### 7.6.1 Reported benefits

Facility interviews describe better access to maternity, diagnostic and education services. Kagumba Health Centre III in Kamuli linked its maternity ward to increased delivery and antenatal attendance, while Pamaka Health Centre III in Nebbi reported increased patient attendance and confidence in local services. At Lukale Health Centre III in Buvuma, the maternity ward enabled women to give birth locally instead of crossing water and provided greater privacy.

Education interviews also linked the investments to wider access and better teaching facilities. Musiitwa Seed Secondary School in Kayunga reported expanded access for nearby communities and used its irrigation system for demonstration lessons and food production. Kigorobyia Seed Secondary School in Hoima described support to classrooms, the ICT room and chemistry laboratory. These are the service changes reported by the institutions during verification.

Source: O05; O06; O08; O17; O26; O27; Appendix 8.8 gives the document and locator.

### 7.6.2 Operational constraints

Equipment produces sustained service benefits when utilities and staff support its use. The Pamaka and Lungulu examples show that power constraints can limit health care and practical computer teaching even after equipment has been delivered. Avogera Health Centre III identified the need for orientation on complex equipment. Bundimulangya Health Centre III in Bundibugyo reported that a power house and solar installation supported continued operation, illustrating the value of including utilities in the investment.

Service demand also places pressure on supporting space and staff. Kagumba Health Centre III identified staff housing and requirements for outpatient, laboratory, storage and kitchen facilities. Kigorobyia Seed Secondary School reported constraints in study materials and staffing, while Musiitwa Seed Secondary School described long travel distances and attendance pressures. These matters require service planning alongside the management of the physical assets.

Source: O05; O09; O13; O16; O22; O24; O26; Appendix 8.8 gives the document and locator.

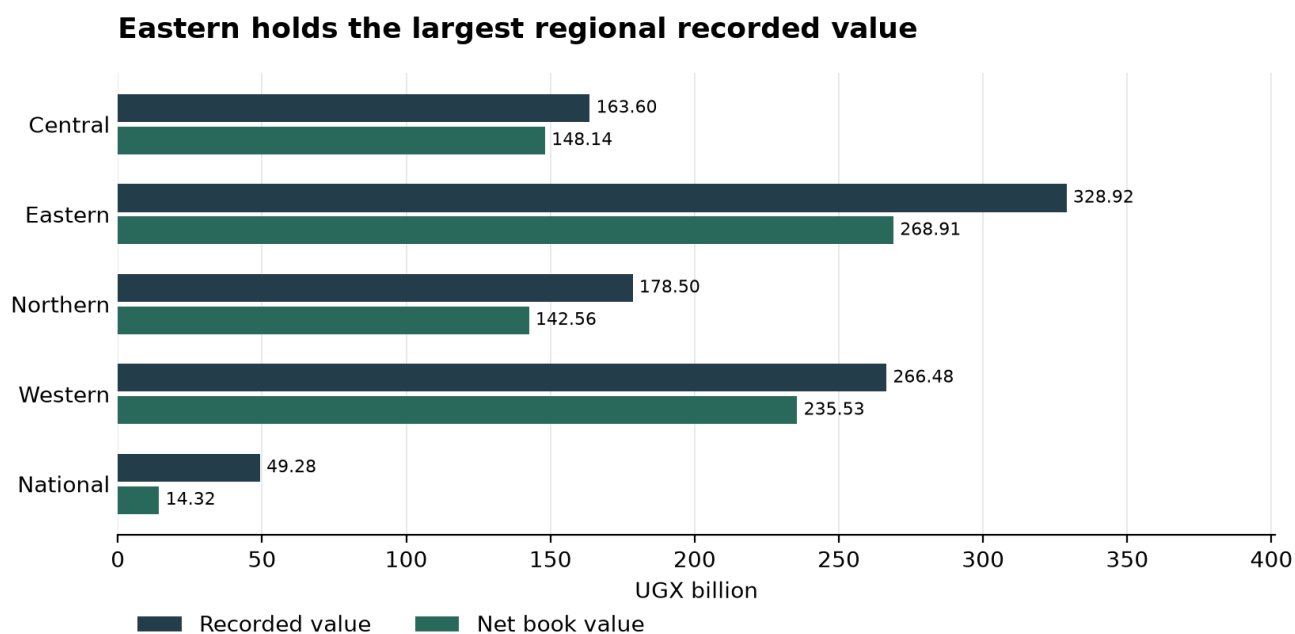

### 7.6.3 Recommendations for sustaining services

Local governments and sector ministries should prioritise the utility connections, building repairs, user training and specialist maintenance that enable equipment already held by facilities to serve patients and learners. Plans should assign responsibility for each action and link completion to the return of an asset or room to use. Facility managers should review functionality and service demand together when preparing maintenance and recurrent budgets.

Future programming should match capital investment with staffing, operating resources and the supporting spaces required by the intended service. It should include facility consultation before procurement and checks after installation, as recommended in the Avogera and Kyankaramata interviews. Schools should combine improvements to teaching facilities with action on attendance barriers through parent engagement and local service planning.

Source: O05; O09; O13; O16; O21; O22; O25; O26; Appendix 8.8 gives the document and locator.

## Recorded value across regions

Source: REF Asset Register, cost and depreciation; row net book value floored at zero.

**Figure 17: Eastern holds the largest regional recorded value**

Source: REF Asset Register, cost and depreciation; row net book value floored at zero.

Figure 17 compares regional recorded value and net book value. Appendix 8.4 provides the underlying amounts.

## 8 Appendices

### 8.1 Full summary count schedule

The summary schedule brings the requested asset measures, master-list measures and return-identity measures together. Asset measures count register rows. The national column contains national institutional holdings, and the whole programme column includes all register rows.

**Table 32: Whole programme and regional summary counts**

| Measure                                                   | Central | Eastern | Northern | Western | National | Programme |
|-----------------------------------------------------------|---------|---------|----------|---------|----------|-----------|
| Asset register rows                                       | 28,192  | 84,681  | 52,303   | 44,164  | 15,793   | 225,133   |
| Assets engraved                                           | 6,235   | 19,992  | 12,064   | 6,951   | 4,969    | 50,211    |
| Engraved with UgIFT marking                               | 1,550   | 6,540   | 4,478    | 3,650   | 4,805    | 21,023    |
| Engraved with other marking                               | 4,685   | 13,452  | 7,586    | 3,301   | 164      | 29,188    |
| Not engraved                                              | 21,957  | 64,689  | 40,239   | 37,213  | 10,824   | 174,922   |
| Use flag YES                                              | 27,028  | 78,939  | 49,052   | 40,821  | 15,773   | 211,613   |
| Use flag NO with damage wording                           | 89      | 1,536   | 524      | 417     | 3        | 2,569     |
| Not in use, stored and explicitly good or new             | 2       | 300     | 66       | 115     | 0        | 483       |
| Functional classification                                 | 27,028  | 78,939  | 49,052   | 40,821  | 15,773   | 211,613   |
| Faulty classification                                     | 1,164   | 5,742   | 3,251    | 3,343   | 20       | 13,520    |
| Facilities sharing or holding assets elsewhere            | 2       | 11      | 12       | 17      | 0        | 42        |
| Ground-return identities outside master names             | 3       | 2       | 10       | 9       | 0        | 24        |
| Does not exist or was not constructed under the programme | 1       | 3       | 5        | 1       | 0        | 10        |
| Replaced by another facility                              | 0       | 0       | 3        | 1       | 0        | 4         |
| Operates under another name                               | 9       | 8       | 0        | 13      | 0        | 30        |
| Not a UgIFT beneficiary                                   | 0       | 1       | 1        | 1       | 0        | 3         |
| Assets relocated to another facility or held at district  | 0       | 0       | 3        | 0       | 0        | 3         |
| Exists with no UgIFT assets                               | 0       | 0       | 1        | 4       | 0        | 5         |
| Health centre master-list entries                         | 62      | 93      | 92       | 124     | 0        | 371       |
| School master-list entries                                | 37      | 76      | 74       | 71      | 0        | 258       |
| Health centre asset rows                                  | 10,153  | 21,250  | 16,991   | 15,565  | 14       | 63,973    |

Source: REF\_ALL\_UGIFT\_ASSET\_REGISTER\_MF\_TEMPLATE.xlsx, Asset Register, rows 2 to 225,134; TAG\_NUMBER is not Not engraved; programme marking contains UGIFT or UGFT, ignoring case.

Table 40 contains the data behind the engraving chart.

## 8.6 Master-list reconciliation and ground-return identities

Each master-list entry below retains its original identity, local government, final supported outcome and reconciliation reference. Names used by receiving facilities and operating institutions remain within the same reconciliation account.

**Table 41: Master-list entries accounted for through reconciliation**

| Master-list entry           | Local government   | Reconciled outcome                                                                                             | Record  |
|-----------------------------|--------------------|----------------------------------------------------------------------------------------------------------------|---------|
| H010 Butoloogo HC II        | Kasanda Central    | The master-list entry Butoloogo HC II does not exist under the programme.                                      | CHAT45D |
| S065 Maddu Seed School      | Gomba Central      | The submitted Kyayi Seed School return was reconciled to the master-list Maddu Seed School.                    | CHAT38  |
| S066 Bufumira Seed School   | Kalangala Central  | The master-list entry Bufumira Seed School was reconciled to Nekemiya Memorial Seed Secondary School.          | CHAT39  |
| H015 Kyakatebe HC II        | Kasanda Central    | The master-list entry Kyakatebe HC II was reconciled to Namabaale Health Centre III.                           | CHAT45C |
| H027 Kagganda HC II         | Lwengo Central     | The master-list entry Kagganda HC II was reconciled to Mbirizi Seed Secondary School.                          | CHAT40  |
| S081 Mpumudde seed school   | Lyantonde Central  | The master-list entry Mpumudde seed school was reconciled to Rwamabara Seed Secondary School.                  | NAME    |
| S084 Kiringente Seed School | Mpigi Central      | The master-list entry Kiringente Seed School was reconciled to Wamatovu Seed Secondary School.                 | NAME    |
| H036 Kabbo                  | Mubende Central    | The master-list entry Kabbo was reconciled to Nakawala Health Centre III.                                      | NAME    |
| S086 Kimenyedde Seed School | Mukono Central     | The master-list entry Kimenyedde Seed School was reconciled to St Andrews Ndwadde mutwe Seed Secondary School. | CHAT08  |
| H054 Bussi HC II            | Wakiso Central     | Bussi is the village name for Zinga Health Centre III; the Zinga return is counted once on H052.               | USER04  |
| H070 Busia Eastern Division | Busia MC Eastern   | The master-list entry Busia Eastern Division does not exist under the programme.                               | CHAT19  |
| S012 Central Division       | Jinja City Eastern | The master-list entry Central Division does not exist under the programme.                                     | USER01  |
| S010 Eastern Division       | Tororo MC Eastern  | The master-list entry Eastern Division does not exist under the programme.                                     | CHAT20  |
| H086 Buyinda HC II          | Kaliro Eastern     | Buyinda HC II is not a UgIFT beneficiary.                                                                      | CHAT14  |
| S011 Igombe                 | Bugweri Eastern    | The master-list entry Igombe was reconciled to Mpiita Seed Secondary School.                                   | CHAT06  |
| H125 Kocheke HC II          | Bukedea Eastern    | The master-list entry Kocheke HC II was reconciled to Kangole / Kocheke Health Centre III.                     | CHAT09  |
| S127 Bunambutye Seed School | Bulambuli Eastern  | The master-list entry Bunambutye Seed School was reconciled to Bumufuni Seed Secondary School.                 | CHAT47B |
| H065 Dabani                 | Busia Eastern      | The master-list entry Dabani was reconciled to Buwumba Health Centre III.                                      | CHAT18  |
| S112 Butagaya               | Jinja Eastern      | The master-list entry Butagaya was reconciled to Buwala Seed Secondary School.                                 | CHAT12  |
| S122 Mwema Seed School      | Namayingo Eastern  | The master-list entry Mwema Seed School was reconciled to Mutumba Seed Secondary School.                       | CHAT13  |

Table 42 lists the 24 return identities by local government. Linked receiving-facility rows and the separately allocated blood banks remain in their own reconciliation accounts.

## 8.7 Accompanying IFMIS-ready registers

The Integrated Financial Management Information System (IFMIS) package retains the field wording and the ministry-format asset register. Each workbook contains 225,133 asset rows. The Asset Register worksheet is the row-level record, with supporting definitions in Read Me.

**Table 43: Accompanying register files**

| Workbook                                      | Asset rows | Columns | Purpose                                                                                          |
|-----------------------------------------------|------------|---------|--------------------------------------------------------------------------------------------------|
| ALL_UGIFT_ASSET_REGISTER_SK_TEMPLATE.xlsx     | 225,133    | 21      | Field wording, institution, facility, source file and source location.                           |
| ALL_UGIFT_ASSET_REGISTER_MF_TEMPLATE.xlsx     | 225,133    | 64      | Ministry-format fields with amounts stated in facility records.                                  |
| REF_ALL_UGIFT_ASSET_REGISTER_MF_TEMPLATE.xlsx | 225,133    | 64      | Ministry-format register with the recorded valuation and depreciation basis used in this report. |

Source: The three accompanying workbook Asset Register and Read Me worksheets; data rows 2 to 225,134.

Table 43 identifies the files delivered with the asset register package. The book code, location segments, asset number, category, tag, use flag, cost and depreciation fields support the institutional asset account. The ministry-format workbook carries 15 field attributes in addition to its core fields.

## 8.8 Sources and photographic locators

The numeric tables and charts cite the register worksheet and their filters beneath each item. The companion sources.md gives the full file paths, row filters, geography placements, source checks and the record behind every headline number. The following source index identifies the narrative and photographic evidence used in the report.

**Table 44: Core sources**

| ID  | Source                                                             | Locator and use                                                                                                        |
|-----|--------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|
| S01 | Client draft verification report                                   | Background and scope: paragraphs 10, 13, 35 to 49; methodology: 95 to 164 and 172 to 206; programme context: 52 to 91. |
| S02 | Agreed report outline                                              | Sections and ordering of national and local government findings.                                                       |
| S03 | Government of Uganda Asset Accounting Policies and Guidelines 2023 | Sections 3.2.1, 3.3.3, 5.5, 5.7 and Annex 1.                                                                           |
| S04 | Facility reconciliation files                                      | README; facility-data-status PDF pages 1 and 5; master-source-rows; facility-reconciliation; supervisor-decisions.     |
| S05 | District master list and team distributions                        | Region and sub-region crosswalk, supplemented by cited district returns and original source filing.                    |
| S06 | Client handwritten summary list                                    | 12 requested summary measures, reflected in Appendix 8.1 and the category schedules.                                   |
