2. Entry

On 2 September the team reached Khabutoola Seed Secondary School in Manafwa. A hand-filled register naming the school is on file together with 0 photographs. The team's own line of writing says the school is partially under construction. Nobody is named as having received the team.

3. Condition and status

The four things the exercise exists to establish. Only what was established on site appears here; the rest is marked as not reported, not guessed.

Dimension	What was established on site
Ownership	Not reported. The guide says the contractor is still in the school.
Functionality	Established on the hand-filled register where lines were filled. The guide says no functionality records are kept because the school is under construction.
Usage / performance	Partly established. The guide says this is the only secondary school in the sub-counties, that it employs support staff, and that the community uses the multipurpose hall; classrooms are few, there is no teacher for the local language, and the boys' pit latrine stands too near a classroom.
Location	Recorded on the register and shown in photographs where any were sent in.

4. Supplied against found

The hand-filled register is the found side and nothing was counted on the day.

5. Engraving and identification

The guide says records exist for science equipment, chemicals and ICT equipment. Engraving is as the register marks it.

6. Obsolete, unserviceable or for disposal

Nothing was named for disposal.

7. Operation and maintenance

The discussion guide was answered. Maintenance has not started because the contractor is still on site.

8. Queries

- Confirm what is complete and what remains under the contractor.
- Nothing here was counted on the day.
- Ownership was not established.
