2. Entry

The team reached this facility on 2 September. A hand-filled register naming Bukimanayi HC III is on file together with 0 photographs. Kayongo Tonny is named as verifier on the cover page.

3. Condition and status

The four things the exercise exists to establish. Only what was established on site appears here; the rest is marked as not reported, not guessed.

Dimension	What was established on site
Ownership	Not reported.
Functionality	Established on the hand-filled register.
Usage / performance	Partly established. The informant says patient enrolment more than doubled and access improved, but the facility is not fenced, the access route fails in the rains and the laboratory is not a standard one.
Location	Recorded on the register and shown in photographs where any were sent in.

4. Supplied against found

The hand-filled register is the found side and nothing was counted on the day.

5. Engraving and identification

Not reported beyond what the register itself marks.

6. Obsolete, unserviceable or for disposal

Nothing on the register was named for disposal.

7. Operation and maintenance

The discussion guide was answered. The facility uses PHC funds for repairs, and asks for fencing, a better access route and a standardised laboratory.

8. Queries
