2. Entry

The team reached Kamuli HC III on 30 August. The roadside signboard reads Kamuli Health Centre III. A hand-filled register naming the facility is on file together with 87 photographs. The register came in on 2 September, after the visit day. Tonny Kayengo is named as verifier on the cover page.

3. Condition and status

The four things the exercise exists to establish. Only what was established on site appears here; the rest is marked as not reported, not guessed.

Dimension	What was established on site
Ownership	Not reported.
Functionality	Established on the hand-filled register. The informant says UgIFT assets are in good shape except the tables, and the facility holds a PHC vote for maintenance.
Usage / performance	Partly established. Service delivery has improved and equipment quality is good, but staffing is low, the facility is not fenced and staff accommodation is short.
Location	Recorded on the register and shown in photographs of the wards, laboratory corner, waste pits and water tanks.

4. Supplied against found

The hand-filled register is the found side and nothing was counted on the day.

5. Engraving and identification

A refrigerator label names Kamuli HC III and asset HF0195. A Transtek blood pressure monitor serial was read. Most lines read not engraved.

6. Obsolete, unserviceable or for disposal

A bench with torn upholstery is on the register; nothing was named for disposal.

7. Operation and maintenance

The discussion guide was answered. The informant asks for fencing, staff houses and replacement of the poor-quality tables supplied.

8. Queries

- The register records five adult beds redistributed to Atangi HC III and one delivery bed to Malaba HC IV; put the transfers on the district record.
- Nothing here was counted.
- Ownership was not established.
- The programme list carries Kamuli HCII and the signboard reads level III.
