

01 / EXECUTIVE SUMMARY

# Facility completion status

**Coverage is 586 of 629 master facilities (93.2%).** Coverage includes every facility except the 43 with no return. Within this coverage, 546 are complete, 23 need a decision and 17 have an explained outcome. The completed total includes 504 with facility-specific material and 42 with identifiable information in consolidated asset registers. “Complete” means the data is sufficient for this reconciliation; it does not certify that every asset was physically inspected.

The master contains 632 source rows and 629 distinct schools and health centres. Kapedo in Karenga, Nyamarunda in Kibaale and Kidubuli Health Centre III in Kabarole are each listed twice within the same local government, so each facility is counted once. The 3 regional blood banks are reported separately. School names use the Seed Secondary School standard, and every master Health Centre II is shown at its upgraded Health Centre III level.

## Status of the distinct master facilities

| Status          | Count | %     | What it means                                                                                                                                                                                                                          |
|-----------------|-------|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Completed       | 546   | 86.8% | Identifiable facility information is available in a facility return or consolidated register. Examples: Ntwetwe Seed Secondary School has a facility toolkit; Awei Seed Secondary School has identifiable rows in the Team 7 register. |
| No return       | 43    | 6.8%  | No matched facility return or identifiable asset row is on file, and no documented reason places it in another status. This does not prove absence. Example: Kiziranfumbi Seed Secondary School, Kikuube.                              |
| Needs review    | 23    | 3.7%  | A submitted alternate name, commissioning stage, access constraint, or verification account requires confirmation. These cases count as reconciled coverage, but not as completed field evidence.                                      |
| Explained cases | 17    | 2.7%  | 9 reported absent; 4 no UgIFT assets; 2 outside UgIFT; 2 replaced.                                                                                                                                                                     |

**Replaced / 2 facility / 0.3%.** The replacement already has its own master entry, so its evidence is counted there once. Example: Loinya Health Centre III was replaced by Liko Health Centre III; Liko is already represented by master entry H212.

## The immediate follow-up

Start with Teams 25, 30 and 32, which account for 20 of the 43 outstanding returns. Resolve the 23 reconciled cases awaiting confirmation and confirm the reported absences with the relevant local governments. Onywako has a return but explicitly was not physically verified; Iceme has conflicting accounts of the visit.

36 unmatched ground names or returns are listed separately. Some may be aliases of master entries; they are not a confirmed count of additional facilities and are not added to the master evidence totals.

Reading the lists: H = health-centre master row; S = school master row; X = unmatched ground record; B = blood bank. “Team 17,” for example, means the field team responsible for that facility. SS means secondary school; MC means municipal council. IDs link to the companion reconciliation and evidence CSVs.

**Percentage basis.** Summary percentages use the 629 distinct master facilities. Each team coverage percentage uses that team's listed facilities and includes every status except No return. The 36 unmatched ground names or returns and 3 regional blood banks are excluded.

**Report sections.** 2 Team responsibility / 3 Returns needing a decision / 4 Outstanding returns and explained cases / 5 Completed facilities / 6 Unmatched ground names / 7 Blood banks and counting.

## 02 Team responsibility

Counts below cover the master list only. **Completed** includes identifiable information from either a facility-specific return or a consolidated register. **Coverage** includes every listed facility except those in No return; it is not a physical-verification rate. The named supervisor owns the follow-up; the full allocation remains in team-distributions.docx.

| Team         | Supervisor         | Listed     | Completed  | Coverage     | No return | Review    | Other*    |
|--------------|--------------------|------------|------------|--------------|-----------|-----------|-----------|
| 1            | Kiribakka Vincent  | 19         | 15         | 100.0%       | 0         | 0         | 4         |
| 2            | Kiribakka Vincent  | 21         | 19         | 100.0%       | 0         | 0         | 2         |
| 3            | Kiribakka Vincent  | 14         | 14         | 100.0%       | 0         | 0         | 0         |

| 33           | Lawrence Kalyowa   | 22         | 13         | 68.2%        | 7         | 2         | 0         |
| <b>Total</b> |                    | <b>629</b> | <b>546</b> | <b>93.2%</b> | <b>43</b> | <b>23</b> | <b>17</b> |

\*Other = reported absent, no UgIFT assets, outside UgIFT or replaced. A zero means no entry in that status, not confirmation that verification is complete.

## 03 Returns that need a decision

23 master entries have conflicting identity, location or verification accounts. The supervisor should resolve the point shown, then correct or confirm the return. “Team 17,” for example, is the field team responsible for the facility. Full documents and worksheet locations are linked by ID in facility-evidence-index.csv.

| Master entry / team and LG                                                                          | Point to resolve                                                                                                                                                                                                                   |
|-----------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Iceme Health Centre III</b><br>Team 5 / Oyam<br>H202                                             | Original Icheme return says physical verification was not conducted. Revised return says a late-evening visit took place without photos. Supervisor to confirm which account applies.                                              |
| <b>Busota Health Centre III</b><br>Team 18 / Kamuli MC<br>H092                                      | Busota softcopy received from Sulaina on 21 Sep at 16:47. Cover names Kamuli district; checklist and master name Kamuli MC. Confirm the LG heading.                                                                                |
| <b>Nyakishenyi Seed Secondary School</b><br>Team 23 / Rukungiri<br>S249   Facility-specific return  | Team 23 submitted Bikurungu Seed Secondary School in Rukungiri; confirm whether it is the renamed Nyakishenyi master entry.                                                                                                        |
| <b>Ngoma Seed Secondary School</b><br>Team 24 / Nakaseke<br>S004   CHAT36                           | Sulaina said Ngoma Seed School was changed to Budongo Seed School, but did not name the local government. Master Ngoma is in Nakaseke and master Budongo is in Masindi, so the rows stay separate until the district is confirmed. |
| <b>Kyondo Health Centre III</b><br>Team 26 / Bundibugyo<br>H370   CHAT31   Facility-specific return | Depaul confirmed on 23 September 2026 that Kyondo HC III could not be visited because the CAO said the mountainous road was dangerous.                                                                                             |
| <b>Mantoroba Health Centre III</b><br>Team 26 / Bundibugyo<br>H318   Facility-specific return       | Team 26 verified Busanga Health Centre III, which is absent from the master, while Mantoroba has no matching return; confirm the intended allocation.                                                                              |
| <b>Kichwamba Seed Secondary School</b><br>Team 26 / Kabarole<br>S059                                | No completed asset return is on file. The master records this project as ongoing, so the facility is treated as a documented eligibility/commissioning follow-up rather than an unexplained missing return.                        |
| <b>Kidubuli Health Centre III</b><br>Team 26 / Kabarole<br>H329   Facility-specific return          | Team 26 submitted Iruhura and Nyambuusa Health Centre III returns while Kidubuli and Nyabuswa remain on the master; confirm the one-to-one mapping.                                                                                |
| <b>Nyabuswa Health Centre III</b><br>Team 26 / Kabarole<br>H332   Facility-specific return          | Team 26 submitted Iruhura and Nyambuusa Health Centre III returns while Kidubuli and Nyabuswa remain on the master; confirm the one-to-one mapping.                                                                                |
| <b>Kabingo Health Centre III</b><br>Team 27 / Kasese<br>H373   CHAT27   Facility-specific return    | Depaul confirmed on 23 September 2026 that the Kabingo information was obtained by phone because the team could not reach the facility. Physical verification stays unconfirmed.                                                   |
| <b>Karago Tc Seed Secondary School</b><br>Team 28 / Fort-Portal City<br>S058                        | No completed asset return is on file. The master records this project as ongoing, so the facility is treated as a documented eligibility/commissioning follow-up rather than an unexplained missing return.                        |
| <b>Kabweza Health Centre III</b><br>Team 28 / Kyegegwa<br>H345                                      | Process report describes Kyankaramata rather than the named facility. Confirm the report and facility-specific evidence.                                                                                                           |
| <b>Kataraza Health Centre III</b><br>Team 28 / Kyenjojo<br>H349                                     | Process report describes Kyankaramata rather than the named facility. Confirm the report and facility-specific evidence.                                                                                                           |

| Master entry / team and LG                                                                                                | Point to resolve                                                                                                                                                                                                                |
|---------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Kabbo Health Centre III</b><br>Team 28 / Mubende<br>H036   Facility-specific return                                    | Team 28 submitted Nakawala Health Centre III in Mubende while Kabbo remains on the master; confirm the intended master-to-ground mapping.                                                                                       |
| <b>St Mugagga Vocational Seed Secondary School</b><br>Team 30 / Kibaale<br>S235   CHAT30   School interview and checklist | Name confirmed; verification limited. The updated toolkit uses St Mugagga Vocational Seed School and says the asset source documents could not be accessed. The visit is not a completed asset verification.                    |
| <b>Mamba Health Centre III</b><br>Team 32 / Gomba<br>H008                                                                 | Gomba/Mamba cover conflicts with an interview naming Kibiri. Confirm the correct form and checklist. On 23 September the supervisor also said Kyegonza HC III is Mamba HC III; that alias does not resolve the Kibiri conflict. |
| <b>Kireka Health Centre III</b><br>Team 32 / Kiira MC<br>H359                                                             | No completed asset return is on file. The master records this project as ongoing, so the facility is treated as a documented eligibility/commissioning follow-up rather than an unexplained missing return.                     |
| <b>Kirinya Health Centre III</b><br>Team 32 / Kiira MC<br>H358                                                            | No completed asset return is on file. The master records this project as ongoing, so the facility is treated as a documented eligibility/commissioning follow-up rather than an unexplained missing return.                     |
| <b>Kibiri Health Centre III</b><br>Team 32 / Makindye-Ssabagabo MC<br>H050                                                | Kibiri cover/interview conflicts with a Gomba/Mamba checklist in one return. Separate Kibiri process report received; reconcile the toolkit.                                                                                    |
| <b>Mutungo Health Centre III</b><br>Team 32 / Makindye-Ssabagabo MC<br>H356                                               | No completed asset return is on file. The master records this project as ongoing, so the facility is treated as a documented eligibility/commissioning follow-up rather than an unexplained missing return.                     |
| <b>Kasangati TC/Mutuba-Nangabo Health Centre III</b><br>Team 32 / Wakiso<br>H357                                          | No completed asset return is on file. The master records this project as ongoing, so the facility is treated as a documented eligibility/commissioning follow-up rather than an unexplained missing return.                     |
| <b>Kagganda Health Centre III</b><br>Team 33 / Lwengo<br>H027   CHAT40                                                    | Lawrence said Kagganda in Lwengo is Mbirizi Seed School. The master lists Kagganda as a health centre and lists Lwengo Seed School separately, so the health-centre row is not merged into the Mbirizi school folder.           |
| <b>Lwengo Seed Secondary School</b><br>Team 33 / Lwengo<br>S080                                                           | The 23 September message identifies Mbirizi Seed School as Kagganda, not as Lwengo Seed School. The earlier possible link to the Mbirizi folder is not confirmed.                                                               |

### Onywako: return received, physical verification not done

**X019 / Team 5 / Lira.** The form says the assets were reported by the in-charge and could not be physically verified. Keep this separate from completed visits. No explicit instruction pairs Onywako with the missing Alik master entry.

## 04 Outstanding returns and explained cases

**17 facilities are excluded from the 43 outstanding-return total** because a specific reason has been documented. They remain in the master reconciliation and are not automatically treated as physically verified. The reason for each exclusion is shown below.

| Master entry / responsible team                                                                                         | Recorded reason                                                                                                                                                                              |
|-------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## 05 Completed facilities

**546 completed facility records** follow: 504 have facility-specific material and 42 have identifiable information in consolidated registers. They share one Completed status. The companion CSVs retain the source file, worksheet and row for audit. Completion does not certify that every asset was physically inspected.

Supervisor-confirmed naming changes are counted against the relevant master entry when field material is on file. This includes Butagaya / Buwala and Mwema / Mutumba. The reconciliation CSV retains the submitted name, source file and decision reference.

## 06 Unmatched ground names and returns

**36 submitted facility names could not be linked confidently to a master-list entry.** They are shown separately and are not included in the 629 master-facility totals. Confirm the correct master name, or approve the facility as an addition.

**Return received** means evidence is on file but the master match is unknown. **Check identity** means the name or local government conflicts with another record. **Not physically verified** means the site visit was not completed.

| Submitted name / team and LG                                                                                                             | What is known / next action                                                                                                                                                                                                                  |

## 07 Blood banks and counting

### Regional blood banks

These three facilities are allocated in team-distributions.docx and sit outside the school/health-centre master denominator.

| Allocation                                                      | Evidence status                                                                                                                  |

| <b>Hoima Regional Blood Bank</b><br>Team 25 / Hoima City / B006 | <b>Field evidence</b><br>Team 25 supplied the Hoima Regional Blood Bank inventory workbook and photographs on 23 September 2026. |

### How the totals were counted

A repeated facility means the same facility appears more than once within one local government. The master has 632 rows and 629 distinct facilities after three such facilities are counted once. Every retained master ID appears once in the status lists in sections 3-5. Construction labels such as Complete and Ongoing describe the project, not asset verification.

| Facility                   | Local government | Source IDs  | Why counted once                                                                              |
|----------------------------|------------------|-------------|-----------------------------------------------------------------------------------------------|
| Kapedo                     | Karenga          | S146 + S147 | Same school listed for Phase II and Phase III; both source rows are preserved.                |
| Nyamarunda                 | Kibaale          | H299 + H300 | The same health-centre name appears twice.                                                    |
| Kidubuli Health Centre III | Kabarole         | H329 + H331 | The same health centre appears twice in the master and is counted once at its upgraded level. |
